29TH ANNUAL CONVENTION

BOSTON, MA, USA | MAY 25 – 28

CONTENTS

PLENARY PROGRAMS

FRED KAVLI KEYNOTE ADDRESS 35
Rome Wasn't Built in a Day But Maybe Latin Was
Lila R. Gleitman, University of Pennsylvania

PRESIDENTIAL SYMPOSIUM 58
Sense and Sensibility: How Our Bodies Do — and Don't — Shape Our Minds
Susan Goldin-Meadow, The University of Chicago (Chair)
Jessica K. Witt, Colorado State University
Amy J.C. Cuddy, Harvard University
Susan Wagner Cook, The University of Iowa
Ted Supalla, Georgetown University

BRING THE FAMILY ADDRESS 73
What Makes the Human Mind Special? Insights From Nonhuman Animals
Laurie R. Santos, Yale University

THEME PROGRAMS

The 29th Annual Convention features three cross-cutting theme programs addressing key topics in psychological science. Each program includes a variety of presentations by distinguished speakers.

The Many Flavors of Relationships 42
The Science of Fear: From Basic Psychological Mechanisms to Impact on Society 52
Doing the Most for the Many: Psychological Scientists Who Inform Public Policies 68

DAILY SCHEDULE

Thursday, May 25 31
Friday, May 26 37
Saturday, May 27 61
Symposium Sunday, May 28 75

EXHIBITORS

Meet publishers, buy books, try new statistics software, pick up free goodies, and more! 89

PROGRAM IN

Survey Methodology

The Michigan Program in Survey Methodology (MPSM) is a program where students learn the science of surveys. Students in the program receive theoretical grounding in all aspects of survey methodology, from sample design and measurement, to modes of data collection, statistical estimation, questionnaire design and probability sampling methods. Students have the opportunity to explore novel ways to develop applications of survey methodology in a wide variety of fields.

APS President's Letter

Welcome to Boston

On behalf of the APS Board of Directors, I am delighted to welcome you to the 29th Annual Convention of the Association for Psychological Science. Here in a setting just a short walk away from historic Fenway Park, I can promise you that the science you'll see over the next few days will touch all the bases of our playing field, from cognitive to developmental, biological to social, clinical to quantitative.

This dynamic and exciting program was made possible through the valiant efforts of Program Committee Chair Michelle "Lani" Shiota and committee members **Daniel Ansari, Silvia Bonaccio, Elizabeth Gershoff, Jeffrey Holmes, Thomas Olino, Elizabeth Page-Gould, Luiz Pessoa, Douglas Samuel, and Jessica Tracy.**

Susan Goldin-Meadow

Exciting new developments at APS serve as a backdrop for this year's convention. Our initiatives to enhance research methodology and practices are making great strides. We are developing a new journal, *Advances in Methods and Practices in Psychological Science*. Under the leadership of Editor Dan Simons, this journal will publish large-scale studies using new and innovative methods and modeling, best-practices papers, Registered Replication Reports, multi-lab collaborations, and more. And as part a newly designed website, APS has created a Methodology Center that provides our members with articles, tutorials and other resources on advances in research techniques and practices.

We are also still basking in the success of the second International Convention of Psychological Science, held in March in Vienna, Austria. Roughly 2,100 people from around the world gathered to discuss and learn about the latest cross-cutting ventures and explorations of the mind. ICPS is clearly an established event. And I'm delighted to announce that the third biennial ICPS will take place in March 2019 in Paris, France.

In the digital arena, APS continues to develop new ways to engage with the public and share the latest news and most recent findings in psychological science. Our association now has close to 48,000 Twitter followers and nearly 200,000 fans on Facebook. And visits to our website are climbing now thanks in part to a new design that displays as impressively on a mobile device as it does on a desktop screen.

I'm confident that the innumerable offerings you'll see at this year's annual convention will show you the tremendous range of discoveries, theoretical models, and methodological approaches represented here. This all reflects APS's role as a scientific canopy for more than 33,000 members spanning 97 countries — and almost as many specialties. Special thanks go to the APS staff who have hit a grand slam in putting together this event. I look forward to interacting with all of you over the next few days.

Enjoy this great meeting!

Welcome from the 2017 APS Program Chair

Welcome to the 29th APS Annual Convention, and to our host city of Boston! On behalf of the Program Committee — Daniel Ansari, Silvia Bonaccio, Elizabeth Gershoff, Jeffrey Holmes, Thomas Olino, Elizabeth Page-Gould, Luiz Pessoa, Douglas Samuel, Jessica Tracy, Kathleen Vohs, and myself — I'd like to thank you for joining us this year!

This year's convention reflects the transformation now occurring in psychological science. We're asking critical questions about the state of our field, and exploring ways to improve the validity and impact of future work. We are a diverse group with many perspectives, so debates along the way are inevitable, yet we share common goals — to understand and improve the human experience, and help address the world's challenges in these turbulent times.

In developing this year's program, we chose to dive headlong into the major issues facing our discipline and society at large. The invited program addresses big-picture topics for the future of our field: How do we evaluate the overall state of psychological research? In what ways can our methods improve and grow in the years to come? What role should neuroscience play in the understanding of mind and behavior? What do we do when central findings, with serious theoretical and translational implications, are called into question? Theme programs, symposia, and talks offer data-driven analyses of important social problems as well, such as the roles of behavioral science in public policy, and in public conversations about social issues; the real-world consequences of implicit bias; and implications of fear for intergroup conflict and policy responses to terrorism.

The program also offers rich coverage of new directions and long-standing, central questions throughout our field. As always, methodology workshops and the APS-STP Teaching Institute offer outstanding training opportunities. Lila Gleitman's keynote address and Laurie Santos' "Bring the Family" address each consider uniquely human capacities in language and cognition. Susan Goldin-Meadow's presidential symposium features ways in which bodily interactions with the environment shape our mental lives. APS Lifetime Achievement Award speakers honor individuals whose careers have greatly advanced our understanding of the human mind. Symposia and talks address questions bridging theoretical, methodological, and applied concerns, such as: What challenges and opportunities will neuroimaging face in the decades to come? What are the implications of sleep deprivation for the workplace? Do "brain-training" programs actually work? What are the developmental pathways to psychological disorder, and how can we promote resilience? Can stress in early childhood have some positive long-term consequences? How do people make moral judgments and decisions?

As our discipline undergoes transformation, so do the individuals within it. We recognize that some invited speakers have been the focus of controversy in recent years. We want to hear what they have to say, and encourage you to listen with an open mind as well.

Personally, I'd like to express my gratitude to the APS staff for their immense effort and skill in organizing this convention, and APS Executive Director Sarah Brookhart for her dedicated leadership.

Finally, we know how much you, the members of APS, contribute to the intellectual richness and excitement of this meeting. Thank you for bringing your own work to the program; we look forward to seeing the fruits of your efforts this last year. I hope you enjoy the convention, and the historic City of Boston!

KARYN E. POLITO
LIEUTENANT GOVERNOR

May 2017

Dear Friends:

On behalf of the Commonwealth of Massachusetts, Karyn and I welcome you to the 29th Annual Association for Psychological Science Convention.

The Association for Psychological Science has been inspiring researchers to delve into new and unconventional areas of study to expand the field of psychological sciences. The Association for Psychological Sciences has also provided a forum and a variety of journals such as Psychological Science, Current Directions in Physiological Science, and Psychological Science in the Public Interest for psychologist to publish their work.

We are delighted to welcome the Annual Association for Psychological Science Convention back to the city of Boston. The Baker-Polito administration encourages organizations such as these to continue to gather and inspire researchers to expand the field of Psychological Science.

Please accept our warmest wishes on a successful convention.
Sincerely,

A handwritten signature in blue ink that reads "Charles Baker".

GENERAL INFORMATION

Registration

Registration for the 29th APS Annual Convention includes all educational sessions (unless otherwise noted) including: the Opening Ceremony, Keynote Address, and Opening Reception on Thursday; the Presidential Symposium and Friday Night Reception; the Bring the Family Address and Saturday Night Reception; poster sessions and symposia; and coffee breaks. Separate registration is required for the 24th Annual APS-STP Teaching Institute.

Location and Hours

On Wednesday, the APS Registration Desk is located on the 3rd Floor Foyer of the Sheraton Boston Hotel.

Wednesday, May 24 4:00 PM – 8:00 PM

On Thursday – Sunday, the APS Registration Desk is located on the Grand Prefunction of the Second Floor of the Sheraton Boston Hotel.

Thursday, May 25 7:30 AM – 9:00 PM

Friday, May 26 7:30 AM – 6:00 PM

Saturday, May 27 7:30 AM – 6:00 PM

Sunday, May 28 7:30 AM – 2:00 PM

Fees

Registration fees are based on the APS membership categories listed below. APS membership must be current to receive the APS Member or Student Affiliate rate:

	Convention	Teaching Institute	Both
APS Member	\$375	\$295	\$480
APS Student Affiliate	\$245	\$200	\$270
Federal Government	\$245	\$200	\$270
Non-Member	\$635	\$370	\$790

24th Annual APS-STP Teaching Institute

The Teaching Institute is sponsored by the Association for Psychological Science and the Society for the Teaching of Psychology. The day-long program offers informative talks and practical advice from experts on the teaching of psychology. See page 96 for schedule.

Poster Sessions

Refer to the “2017 APS Convention” app and APS website (www.psychologicalscience.org/convention) for times and locations of poster sessions. Posters may be stored at the poster storage desk located at the APS Exhibit Hall entrance in the Sheraton Boston Hotel.

Name Badges

APS requires name badges for admission to all meeting rooms, the Exhibit Hall, and social events. Non-transferable name badges will only be issued to persons who have registered for the 29th APS Annual Convention.

Convention Program

Attendees receive one APS Program book. The program (including posters and abstracts) is available in the “2017 APS Convention” app and online at www.psychologicalscience.org/convention.

Workshops

Workshops are open to APS Convention and Teaching Institute registrants only. Separate registration is required for all workshops. Except where noted, there is a modest fee for workshop registration (students: \$45; all others: \$70). You can register at the APS Registration Desk. Refer to page 25 for more information on workshops.

Hotel

All program activities for the 29th APS Annual Convention are in the Sheraton Boston Hotel (39 Dalton Street, Boston, MA 02199, USA; +1 617.236.2000). Maps of the Sheraton Boston Hotel are in the back of this program.

Concierge

The Sheraton Boston Hotel staff will gladly assist with show tickets, restaurant reservations, city tours, and general information about Boston. Assistance is available at the Concierge Desk in the Lobby during hours of operation.

Continuing Education Credits

The Temple University Department of Psychological Studies in Education (PSE) is approved by the American Psychological Association to sponsor continuing education for psychologists. PSE maintains responsibility for this program and its content. To receive credit you must arrive on time for each session, stay for the full session, complete and turn in the evaluation form at the end of each session.

Exhibit Hall

Attendees are encouraged to visit the APS Exhibit Hall located on the Third Floor Foyer of the Sheraton Boston Hotel. The Exhibit Hall is open during poster sessions at the 29th APS Annual Convention. Exhibit Hall hours are:

Thursday, May 25	8:00 PM – 9:30 PM
Friday, May 26	8:30 AM – 5:00 PM
Saturday, May 27	8:30 AM – 5:00 PM
Sunday, May 28	8:30 AM – 2:00 PM

More information about exhibits is available on page 89.

APS Convention App

With the free “2017 APS Convention” app you can search the full APS Convention program, including poster sessions, to create a custom schedule. Search the program by day, keyword, and speaker name to build your itinerary. The app is available for iPhone, iPad, and Android devices. If you don't have one of those “smart” devices, a web version is available at: <http://ativ.me/biq>.

GENERAL INFORMATION (CONT.)

Internet Access

APS is pleased to provide meeting attendees with complimentary wireless Internet access throughout the meeting space and lobby of the Sheraton Boston Hotel. Select the "SSID: SHERATON MEETING" wireless network. Launch a web browser then; when prompted, enter the Conference Code "aps2017" and click on "submit". (The conference Welcome Page or hotel main page will display and you can now browse the Internet.) As a courtesy to fellow attendees, please refrain from downloading large files.

Photography and Video Release

As part of your registration for the 29th APS Annual Convention, APS reserves the right to use professional photographs and video taken during the Convention for future marketing purposes.

Boston Convention & Visitors Bureau

The Sheraton Boston Hotel staff will gladly assist with show tickets, restaurant reservations, city tours, and general information about Boston. Assistance is available at the Concierge Desk in the lobby of the Sheraton Boston Hotel during hours of operation.

ADA Accessibility/Accommodations

APS is committed to ensuring that the Convention is fully accessible to all persons. If you have a specific accessibility or dietary requirement, please contact Jennifer Alexander or Derica Clarke at the APS Registration Desk and every effort will be made to accommodate your request. The Sheraton Boston Hotel is fully equipped to accommodate special needs.

Smoking Policy

The hotel is a smoke free building. All guest rooms, public space, and restaurants are non-smoking.

29TH ANNUAL CONVENTION | BOSTON, MA, USA | MAY 25-28, 2017

MEET THE AUTHORS

These psychological scientists will sign copies of their books at the APS Convention.

Ted Supalla

Sign Language Archaeology: Understanding the Historical Roots of American Sign Language

Ted Supalla will sign copies of his book immediately following the Presidential Symposium.

Friday, May 26 | 7:35 PM – 7:55 PM
Constitution Ballroom

Lisa Feldman Barrett

How Emotions Are Made: The Secret Life of the Brain

Lisa Feldman Barrett will sign copies of her book in the APS Exhibit Hall Events Area.

Saturday, May 27 | 3:00 PM – 3:20 PM

Thursday, May 25

6:00 PM – 8:00 PM Grand Ballroom

Neither speech nor signed language leave a trace in the fossil record, so evidence on the evolution of language is necessarily indirect. I suggest that the language-learning child is a model of (or “is,” depending on what “is” is) language evolution in homo sapiens.

Bring the Family Address

What Makes the Human Mind Special? Insights From Nonhuman Animals

Laurie R. Santos

Yale University

Saturday, May 27

6:00 PM – 7:00 PM Grand Ballroom

Why are humans the only species that reads fiction, tells jokes, and shares photos on Instagram? In this talk, I will explore this question of human uniqueness by examining what makes the human mind so different from that of other animals. I will first discuss recent work in comparative cognition that shows a number of ways that other animals are strikingly similar to humans in the way they think about the world. I will also explore some key cognitive differences between humans and other animals that make the human species different from other animals but also a bit less rational than you might expect.

Presidential Symposium

Sense and Sensibility: How Our Bodies Do — and Don't — Shape Our Minds

Susan Goldin-Meadow (Chair)

The University of Chicago

Friday, May 26

6:00 PM – 8:00 PM Grand Ballroom

Human thoughts are not disembodied — they are created by people who use their bodies to interact with each other and the world around them. This symposium explores the ways in which our mental lives are — and are not — shaped by these bodily interactions with the environment. The speakers explore how using our bodies can influence four important aspects of the way we understand our world: (1) the way we see the world, (2) the way we feel about ourselves and the world, (3) the way we learn about the world, and (4) the way we communicate to others about the world.

Inside ^{the} Psychologist's Studio

FEATURING

LILA R. GLEITMAN

PROFESSOR OF PSYCHOLOGY, EMERITA, UNIVERSITY OF PENNSYLVANIA

LILA R. GLEITMAN
University of Pennsylvania

Lila R. Gleitman's is Professor of Psychology, Emerita, at the University of Pennsylvania. A linguist by training, Gleitman became fascinated by the psychological mechanisms underlying language learning when her own daughters learned to talk. Her research has uncovered basic, shared processes that allow children in a variety of circumstances — for example, both blind and sighted children — to arrive at remarkably similar understandings of the same native language. Gleitman's innovative work sets her apart as expert in developmental psychology, the mental lexicon, and the relationship between language and thought. She also has been recognized as a Fellow of APS, the Association for the Advancement of Science, the American Academy of Arts and Sciences, the National Academy of Sciences, and the Society of Experimental Psychologists. She has served as president of the Linguistic Society of America. In 1995, she was awarded the Prix Internationale by the Fyssen Foundation, and in 2017, she was awarded the David E. Rumelhart Prize by the Cognitive Science Society.

SATURDAY, MAY 27

10:30 AM - 11:50 PM | ROOM 210, HYNES CONVENTION CENTER

Seating for this special event will begin at 10:30 AM. Doors will close at 10:45 AM.

Be part of a live studio audience for this interview in Boston.

Like its quasi-namesake, the APS Inside the Psychologist's Studio series features interviews with legends of psychological science. Lila R. Gleitman will be interviewed by APS President Susan Goldin-Meadow, The University of Chicago. During the conversation, Gleitman will look back on her research and accomplishments, and how those experiences shaped her career and the field.

Interviewed by

SUSAN GOLDIN-MEADOW
The University of Chicago

Gleitman joins a distinguished line-up of psychological scientists featured in the Inside the Psychologist's Studio video series (available online), which includes interviews with Albert Bandura, Paul Ekman, Annette D. Karmiloff-Smith, Elizabeth F. Loftus, Walter Mischel, Eleanor E. Maccoby, Steven Pinker, Michael I. Posner, Janet Taylor Spence, Claude M. Steele, and more.

WATCH these interviews with leaders in psychological science at www.psychologicalscience.org/itps

Why Join Psi Chi?

Psi Chi offers **more resources** tailored for your psychology career path than any other honor society.

Joining or reconnecting with our **Professional Organization** unites you with more than **700,000 members** who share similar interests in psychology.

All Psi Chi members are **members for life**.

Membership Benefits

- **\$400,000 in Awards, Grants, and Scholarships**
- **Access to read and publish in**
 - a. *Eye on Psi Chi* magazine
 - b. *Psi Chi Journal of Psychological Research*
 - c. *Psi-Chi-ology Lab*
- **Advantages through your local chapter**
 - a. Leadership experiences
 - b. Valued friendships
 - c. Personalized education
 - d. Mentoring involvement
 - e. Community service
- **Job opportunities in our Career Center**
- **Networking at conventions**
- **Social media on LinkedIn, Facebook, and Twitter**
- **Online resources about**
 - a. Attending and presenting at conventions
 - b. Career preparation
 - c. Conducting research
 - d. Graduate school
 - e. Leadership

Rome Wasn't Built in a Day But Maybe Latin Was

Lila R. Gleitman

University of Pennsylvania

Neither speech nor signed language leave a trace in the fossil record, so evidence on the evolution of language is necessarily indirect. I suggest that the language-learning child is a model of (or "is," depending on what "is" is) language evolution in homo sapiens.

The Keynote Address is preceded by the presentation of awards.

Are We Creating a Society of Smart Fools? Lessons From 40+ Years of Research on Human Intelligence, Creativity, and Wisdom

Robert J. Sternberg
Cornell University

The good news: Standardized tests of intelligence and academic preparation are modest to moderate predictors of academic success. The bad news: The tests are relatively poor predictors of

skills in scientific reasoning, creativity, common sense, wisdom, and ethical reasoning and behavior. Do we really want to create a society of smart fools? Have we?

CROSS-CUTTING THEME PROGRAM

9:00 AM – 11:50 AM

Commonwealth

The Many Flavors of Relationships

People are living alone, working longer, and living to old age more than ever before. These changing demographics raise the importance of understanding the myriad of relationships in which people are embedded. Starting with family connections during early childhood, continuing with the centrality of peers in late childhood and early adulthood, and extending to professional networks in the workplace, this symposium aims to raise the profile of the diversity in relationships across life stages. Davies's work pinpoints the consequences of parental discord on children, and Conger illuminates the boons and banes of adult sibling relationships. Oishi focuses on friendship in adulthood. Ragins reviews what underlies high-quality mentoring, and Cohen provides a broad overview of social support and integration. If you've ever been curious about the science behind the wide variety of relationships that shape people's lives, this session is for you.

9:05 AM – 9:35 AM

Children's Coping With Interparental Discord: An Emotional Security Formulation
Patrick Davies, University of Rochester

The presentation will cover the latest programmatic research on how children cope with and adjust to difficulties between their parents. Emphasis will be placed on how children's goal of preserving their emotional security advances an understanding of the diversity of outcomes they experience in the context of interparental discord.

9:35 AM – 10:05 AM

Sisters and Brothers Leaving Home and Entering Adulthood: Maintaining Ties Across Time and Space
Katherine Jewsbury Conger, University of California, Davis

Sibling relationships are the longest-lasting relationships in many people's lives. They can also be the most rewarding and frustrating relationships all rolled into one. Yet unlike friends whom we get to choose, we get assigned siblings within our families, and during childhood and adolescence we have to live side-by-side until the first one leaves home. And then what? Although we know a fair amount about how sibling relationships develop during childhood and adolescence, and even in later life, what happens in the intervening years is just now coming of age in the research literature.

10:05 AM – 10:35 AM

The Social Ecology of Friendships
Shigehiro Oishi, University of Virginia

Friendship is crucial in human survival and happiness. Yet there are large individual and cultural variations in the type of friendships people desire and actually have. I will explore the possibility that social ecology affects friendship motivation (e.g., wanting new friends) and friendship networks (e.g., deep narrow vs. shallow broad).

**Coffee Break**

10:35 AM – 10:45 AM

10:45 AM – 11:20 AM

From the Ordinary to the Extraordinary: Understanding High Quality Mentoring Relationships
Belle R. Ragins, University of Wisconsin–Milwaukee

Like other types of relationships, mentoring falls along a continuum of quality, with the majority reflecting average quality. Researchers have focused on average relationships, limiting our knowledge about high-quality relationships. Relational mentoring theory offers new insights by illuminating the unique dynamics, processes, and outcomes of high-quality mentoring relationships.

11:20 AM – 11:50 AM

Social Relationships and Health
Sheldon Cohen, Carnegie Mellon University

Three relationship constructs — social integration (diversity of social roles), social support (availability of resources from one's social network), and negative interaction (e.g., conflict, betrayal) are all associated with physical health. Each influences health through different (independent) mechanisms.

Adaptive Constructive Processes in Memory and Imagination

Daniel L. Schacter

Harvard University

Adaptive constructive processes play a functional role in cognition but can also produce distortions

or errors as a consequence of doing so. This talk will consider cognitive and neural evidence from studies of episodic remembering, future imagining, and related domains that reveal the operation of such processes and provide clues concerning their nature and function.

Overview of JMP Statistical Software for Research and Teaching

Julian L. Parris, JMP Global Academic Program

JMP® is advanced, yet easy to use data analysis and visualization software perfect for both researchers in psychology as well as teachers of statistical methods. JMP includes comprehensive capabilities for data preparation, data analysis, and data visualization. With JMP's intelligent interface you can easily perform basic statistical analysis and tabulations, or fit and validate the most complex predictive models. JMP runs natively on Windows and Macintosh, and integrates with SAS®, R, MATLAB, Python, and Excel.

How Today's Students Are Different and Why It Matters: Teaching Strategies That Lead to Student Success

Robert S. Feldman

University of Massachusetts
Amherst

Do student experiences with technology, texting, tweeting, and multitasking make them learn in different ways from earlier generations of students? We will consider who today's

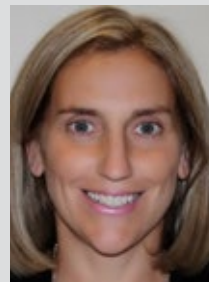

students are, examine what impacts their engagement and success, and discuss the teaching strategies that work most effectively for them.

APS-David Myers Distinguished Lecture on the Science and Craft of Teaching Psychological Science

11:00 AM – 11:50 AM

Reflections on What I've Learned From Walking (or Running) a Step With Students (*N* = 9)

Michelle "Mikki" R. Hebl

Rice University

In this talk, I will present some very brief portions of the bios of nine of my students. Within these bios are themes of humor, sadness, joy, marathon running, and a passion for psychology and research. It is my hope that audiences will see their own students in my students, take away lessons, and affirm that they too appreciate the steps that they get to take with college students.

CROSS-CUTTING THEME PROGRAM

1:00 PM – 3:55 PM

Commonwealth

The Science of Fear: From Basic Psychological Mechanisms to Impact on Society

During the 21st century, a “culture of fear” has developed in much of the Western world. A primordial response to perceived danger, fear alters our perception of and interaction with the world around us and can be used for social and political manipulation. This cross-cutting theme program considers several aspects of fear: why we experience fear and by what neural mechanisms; how these mechanisms can go awry, as in post-traumatic stress disorder; how fear shapes our cognition, real-world decision making, and interactions with people from ethnic and social outgroups; and the roles of fear in terrorism and our responses to it.

1:10 PM – 1:30 PM

Forgetting Fear
Daniela Schiller, Mt. Sinai School of Medicine

Can we change our emotional memories? In extreme situations, when emotional memories become traumatic, we wish to diminish our emotional responses and even “erase” emotional memories altogether. I will describe neuroimaging, pharmacology, and psychophysiology research geared toward understanding the neural mechanisms that make such emotional flexibility possible.

1:30 PM – 1:50 PM

PTSD: Fear Misplaced Leading to Fear Mistakes?
Nnamdi Pole, Smith College

This presentation will discuss fear as it manifests in posttraumatic stress disorder (PTSD). Research focusing on trauma-exposed police officers will be highlighted, including studies documenting abnormalities in fear appraisal and psychophysiological reactivity to threat. Implications for the Black Lives Matter movement will be discussed.

1:50 PM – 2:10 PM

Threat Management, Fear, and Their Implications for Prejudices and Intergroup Relations

Steven L. Neuberg, Arizona State University, Tempe

People possess an evolved system for identifying and managing threats to physical safety. Fear is a critical component of this system, signaling vulnerability and initiating threat-mitigating action. As such, fear powerfully shapes the stereotypes and prejudices we hold, whom we stigmatize and discriminate against, and the course of intergroup relations.

Coffee Break
 2:10 PM – 2:40 PM

2:40 PM – 3:00 PM

The Influence of Fear on Information Processing: An Affect-as-Cognitive-Feedback Account

Linda M. Isbell, University of Massachusetts Amherst

Experimental research demonstrates that fear frequently promotes local, detailed information processing, especially when compared to other emotions, such as anger and happiness, which often promote more abstract, global processing. Our affect-as-cognitive-feedback model predicts a malleable relationship between fear and cognition depending on the context in which fear is experienced.

3:00 PM – 3:20 PM

Epistemic Motivations in the Real World: Fear of Uncertainty, Need for Closure, and Extremism

Arie W. Kruglanski, University of Maryland, College Park

Aversive uncertainty instigates the Need for Cognitive Closure that fosters extreme attitudes toward outgroups. This motivational dynamic underlies the attitudes of both the targets and the perpetrators of violent extremism. Data relevant to these assertions come from laboratory and field research in various world locations and address the relations between aversive uncertainty, need for cognitive closure, and extremism.

We Really Need to Talk: Encouraging and Empowering Interracial Dialogue

Keith B. Maddox

Tufts University

Interracial contact and dialogue are necessary to combat racial bias, largely through the exchange of perspectives leading to productive solutions. However, these opportunities are often avoided because people anticipate negative affective and interpersonal consequences. This talk explores these challenges and describes empirically based strategies to encourage and empower interracial contact and dialogue.

Inhibitory Learning and Inhibitory Regulation During Exposure Therapy: Translation From Basic Science to Clinical Application

Michelle G. Craske

University of California, Los Angeles

Repeated exposure to fear-producing stimuli is effective for fears and anxiety disorders, but a number of individuals fail to respond. Translation from fear extinction and inhibitory regulation offers strategies for increasing response rates to exposure therapy. The underlying theories and evidence for these strategies will be presented.

Sense and Sensibility: How Our Bodies Do — and Don't — Shape Our Minds

CHAIR: **Susan Goldin-Meadow**

University of Chicago

Human thoughts are not disembodied—they are created by people who use their bodies to interact with each other and the world around them. This symposium explores the ways in which our mental lives are—and are not—shaped by these bodily interactions with the environment. The speakers explore how using our bodies can influence four important aspects of the way we understand our world: (1) the way we see the world, (2) the way we feel about ourselves and the world, (3) the way we learn about the world, and (4) the way we communicate to others about the world.

Interdependence, American Style**Hazel R. Markus**

Stanford University

Interdependence pervades many U.S. cultures and psyches. Yet White mainstream American college-educated cultures emphasize independence. As a result, many Americans with power and status have less practice with interdependence.

Promoting interdependence can not only bridge cultural divides within the U.S., but also enhance individual motivation and performance.

CROSS-CUTTING THEME PROGRAM

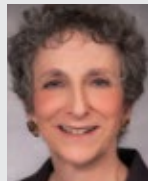

1:00 PM – 3:55 PM

Commonwealth

Doing the Most for the Many: Psychological Scientists Who Inform Public Policies

Psychological science can impact policy through research that informs policy, advocacy for psychologically aware policies, direct involvement with government officials in creating and evaluating programs, and direct service as an elected official. Experts from a range of areas, including clinical, community, developmental, and social psychology, will discuss their experiences interacting with the executive, legislative, and judicial branches of state and federal governments.

1:00 PM – 1:15 PM

Psychology and State Government

Ruth B. Balsler, Massachusetts Legislature
State Representative

After serving as a clinical psychologist for many years, Representative Balsler resolved to serve her community and her state as a

Representative in the Massachusetts state legislature. She will speak about how her career in mental health has informed her politics and helped her be effective in state government and what lessons she has learned along the way.

1:15 PM – 1:30 PM

The Importance of Personal Involvement at the Federal Level

Patrick DeLeon, Former President of
American Psychological Association

Having served with U.S. Senator Daniel K. Inouye for 38-plus years, I have come to

appreciate the critical importance of personal involvement in the public policy (political) process. Psychology has much to contribute to our nation's quality of life. To be effective, however, our collective voice must first be heard.

1:30 PM – 1:45 PM

Advocating for Psychology at the State and Federal Levels

Elena J. Eisman, American Psychological
Association

Throughout her career, Elena J. Eisman has balanced clinical practice with service as an

advocate for psychology in coalitions and task forces and with legislators at the state and national level. As the executive director of the Massachusetts Psychological Association for over 20 years and now Director of the APA Center for Psychology and Health, she will share her experiences as an advocate for the field of psychology and share how others can get involved.

2:20 PM – 2:45 PM

The Reduction in Smoking Prevalence: Influences, Future Challenges, and Lessons

Timothy B. Baker, University of Wisconsin-Madison

Smoking prevalence has fallen markedly over the past 50 years. In this talk, I will describe the

magnitude of this change and its consequences. I will also attempt to identify factors causing this remarkable change and challenges to future progress, and derive lessons learned from a half century of work.

2:45 PM – 3:10 PM

Fuzzy-trace Theory: Risk-reduction Programs that Work for Adolescents and Adults

Valerie F. Reyna, Cornell University

Theoretical mechanisms identified in basic research on risky decision making can be

translated into effective health programs. Applying fuzzy-trace theory to promote gist processing has been shown to increase value-concordant medication decisions, decrease interest in inappropriate genetic testing, and reduce sexual risk-taking in adolescents. Implications for practice and policy are discussed.

3:10 PM – 3:35 PM

Translating Social Science to Improve the Lives of Children and Youth

Elizabeth T. Gershoff, The University of
Texas at Austin

There are many non-academic audiences interested in research on children, including

parents; the media; non-profit organizations; advocates; and local, state, and federal governments, yet academics get no training in how to translate research to these audiences. Elizabeth Gershoff will share what she has learned about translating research and use her work on school corporal punishment as a case study.

Ambivalent Stereotypes Support Inequality and Conflict – or Peace

Susan T. Fiske

Princeton University

Stereotypes go beyond mere valence to include ambivalence on universal dimensions of warmth and competence. Societal variables, such as income inequality and peace or conflict, predict ambivalence across nations. Stereotypes may support social systems through psychological mechanisms such as pity and envy, images of rich and poor people, and race-status associations.

Getting Comfortable With Big Data

Who is doing computational social science, and why? Among social scientists and humanities scholars, there is a clear appetite to engage with data at an accelerated rate. And while a recent study suggests that a majority of researchers who hadn't yet used Big Data would like to, the challenge of the new remains. This session follows from a white paper on 'Who is doing computational social science?' released last year by SAGE Publishing, and will look at the back story of Big Data social science and the fast-paced evolution of enticing opportunities and methods to confront those challenges.

What Makes the Human Mind Special? Insights From Nonhuman Animals

Laurie R. Santos

Yale University

Why are humans the only species that reads fiction, tells jokes, and shares photos on Instagram? In this talk, I will explore this question of human uniqueness by examining what makes the human mind so different from that of other animals. I will first discuss recent work in comparative cognition that shows a number of ways that other animals are strikingly similar to humans in the way they think about the world. I will also explore some key cognitive differences between humans and other animals that make the human species different from other animals but also a bit less rational than you might expect.

Saturday Night Reception

7:00 PM – 8:30 PM

Grand Prefunction

The APS Saturday Night Reception is a wonderful opportunity to renew acquaintances and network with colleagues. Light hors d'oeuvres will be served.

Disney Research

As part of The Walt Disney Company, Disney Research builds upon a rich legacy of innovation and technology leadership in the entertainment industry that continues to this day. Disney Research was launched in 2008 to drive value across company through technological innovation. Our research covers a broad range of exciting and challenging applications that are experienced daily by millions of people around the world.

Our staff interacts directly with all core business areas of The Walt Disney Company including Theme Parks and Imagineering, Consumer Products, our Live Action and Animation Studios, and Media Networks. We publish our research and are actively engaged with the global research community. Our researchers collaborate closely with co-located academic institutions.

The behavior science group at Disney Research has a broad focus, including research in the fields of decision-making, behavioral economics and computational social science, using big data methods and online, lab and field studies.

Sunday, May 28		8:30 AM – 2:00 PM

Association for Psychological Science

BOOTH 115
www.psychologicalscience.org

The Association for Psychological Science (APS) is an international, nonprofit organization with more

than 33,000 members from over 90 countries. APS members include the world's leading psychological scientists — academics, clinicians, researchers, teachers, and administrators — who work to promote, protect, and advance the interests of scientifically oriented psychology in research, application, teaching, and the improvement of human welfare.

Berkeley Initiative for Transparency in the Social Sciences (BITSS)

BOOTH 301
www.bitss.org

An initiative of the Center for Effective Global Action (CEGA), the Berkeley Initiative for Transparency in the Social Sciences (BITSS) was established in 2012 to strengthen the quality of social science research and evidence used for policy-making. The initiative aims to enhance the practices of psychologists, economists, political scientists, and other social scientists in ways that promote research transparency, reproducibility, and openness.

BIOPAC Systems, Inc.

BOOTH 203
www.biopac.com

BIOPAC provides solutions for all your psychology research and educational data acquisition and stimulus delivery requirements. BIOPAC teams with SensoMotoric Instruments (SMI) and Arrington Research to offer an array of eye tracking systems that are easily integrated with stimulus presentation, Virtual Reality environments, physiological monitoring, and other media. Combined with BIOPAC data acquisition systems and AcqKnowledge software, SMI eye tracking systems, offered by BIOPAC, provide extensive acquisition and analysis features that fully support complex experiments. New BioNomadix Logger provides 24 hour high quality data logging for physiology anywhere. Our high-speed MP160 system supports 20+ amplifier options, including noninvasive cardiac output, noninvasive BP, and stimulus presentation options. Data logging systems monitor 1 to 64 subjects. AcqKnowledge software streamlines analysis with automatic signal scoring routines for ECG, HRV, EDA, RSA, EMG, EEG, and EGG. BIOPAC is cited in thousands of publications. Stop by for a hands-on demonstration.

American Insurance Trust (The Trust)

BOOTH 302
www.trustinsurance.com

The American Insurance Trust (The Trust) is the leading provider of professional liability, financial security, and innovative risk management programs — meeting the insurance needs of psychologists, psychology students, and related individuals nationwide for more than 50 years — in academia, research, training and supervision, practice, consulting, and more. The Trust also offers competitive lifestyle and asset protection plans including Term Life, Disability, Long Term Care, Auto and Home, and Retirement Plan Services. Visit us at Exhibit Booth 302 or browse us at www.trustinsurance.com.

American Psychological Association

BOOTH 314
www.apa.org

American Psychological Association is a premier source for information in psychology. APA delivers this information through its expansive collection of books, journals, newsletters, electronic products and its website, www.apa.org.

Help make sure Wikipedia — the #1 online encyclopedia — represents scientific psychology fully and accurately. Join the effort to promote the science of psychology worldwide.

Brain Vision, LLC

BOOTH 305
www.brainvision.com

Brain Vision LLC, offers full service solutions for customized neurophysiological and psychophysiological research on infants and adults. This includes EEG/ERP/BCI software and hardware, fNIRS devices/integration, fMRI compatible equipment, stimulation devices (TMS, tDCS/tACS), wireless system applications for passive, active, dry electrodes, and accessories. This year, we are proud to announce the release of: i) a new compact/wearable EEG recording solution optimized for wireless applications, and ii) new active electrodes that are smaller, lighter, and easier to use, that increase usability for recordings during TMS, tES, sleep, or in work with infants. Let us help you push the boundry of what is possible.

Cambridge University Press

BOOTH 313

www.cambridge.org/academic

Cambridge University Press' publishing in books and journals combines state-of-the-art content with the highest standards of scholarship, writing and production. Visit our stand to browse new titles, available at 20% discount, and to pick up sample copies of our journals. Visit our website to find out more about what we do: www.cambridge.org/academic

Cedrus Corporation

BOOTH 211

www.cedrus.com

NEW! SuperLab X5 adds support for EEG, as well as SMI and Tobii eye trackers. Visit Cedrus' booth for more information, and to see our newest "c-pod" and "m-pod" lab integration devices for sending event markers to EEG, NIR, and eye trackers.

Cengage

BOOTH 315

WWW.CENGAGE.COM

Cengage is the education and technology company built for learners. The company serves the higher education, K-12, professional, library and workforce training markets worldwide. Cengage creates learning experiences that build confidence and momentum toward the future students want. The company is headquartered in Boston, MA with an office hub in San Francisco. Employees reside in nearly 40 countries with sales in more than 125 countries around the world. Visit us at www.cengage.com or find us on Facebook or Twitter.

Center for the Study of Traumatic Stress

BOOTH 307

www.cstsonline.org

The Center for the Study of Traumatic Stress (CSTS), directed by Robert J. Ursano, M.D., with Scientific Director Carol Fullerton, Ph.D., is affiliated with the Department of Psychiatry at the Uniformed Services University of the Health Sciences in Bethesda, Maryland. The CSTS is internationally recognized for research, education, and consultation on the psychological and behavioral effects of trauma and disaster on individuals, families, communities, and the workplace.

Central Intelligence Agency

BOOTH 317

www.cia.gov

The CIA is the premier agency responsible for providing global intelligence on the ever-changing political, social, economic, technological and military environment. Here, your paramount goal and mission will be to protect the national security of the United States. Virtually any job you can imagine is available at the CIA — plus, some you can't even imagine.

Elsevier

BOOTH 316

www.elsevier.com/psychology

Elsevier is a world-leading provider of information solutions that enhance the performance of science, health, and technology professionals. Elsevier was founded in 1880 and has evolved from a small Dutch publishing house devoted to classical scholarship into an international multimedia publishing company with over 20,000 products for educational and professional science and healthcare communities worldwide. We publish over 2,000 peer-reviewed journals, including over 60 psychology journals across Cognitive Science, Applied, Clinical, Developmental/Educational, Mathematical and Social Psychology. To find out more about our journals visit the Elsevier booth at APS and come and speak to one of our Elsevier psychology representatives or visit: www.elsevier.com/psychology.

Frontiers

BOOTH 111

www.frontiersin.org

Frontiers publishes some of the largest and most-cited journals in their fields. Established in 2007, Frontiers drives innovations in peer review, post-publication review, impact metrics, and an ecosystem of open-science tools. Frontiers has published over 50,000 articles across 57 journals and 430 disciplines, which receive 8 million monthly views, and are supported by over 290,000 researchers.

Harvard University Press

BOOTH 312

www.hup.harvard.edu

Founded in 1913, Harvard University Press is the publisher of such classic works as John Rawls's *A Theory of Justice*, E. O. Wilson's *On Human Nature*, and Helen Vendler's *Dickinson*, and continues to be a leading publisher of convergent works in the sciences, humanities, and social sciences. HUP's publication program, which includes important new digital projects and platforms, is driven by the belief that books from academic publishers are more essential than ever before for understanding critical issues facing the world today.

ICAP2018

BOOTH 404

www.icap2018.com

The Canadian Psychological Association (CPA) looks forward to welcoming you to beautiful Montreal, Quebec, Canada for the 29th International Congress of Applied Psychology (ICAP). The Congress, taking place June 26-30, 2018, will showcase global cutting-edge developments in the various domains of applied psychology and the many organizations and academic bodies from around the world that better our industry with their research. More than 4,000 psychology professionals will attend to hear from world-class speakers, network with peers from the four corners of the globe, and enhance the visibility and strength of the field of applied psychology. Don't miss your chance to hear from leading experts, advance your career, and explore Lonely Planet and Condé Nast's top travel destination for 2017. Visit www.icap2018.com today to start planning your visit. Au plaisir de vous voir à Montréal!

iWorx

BOOTH 201

www.iworx.com

iWorx Systems provides advanced hardware and software tools for both laboratory teaching and research in psychological physiology. Our courseware includes recording and analysis of EEG, EOG, ECG, GSR, Breathing Techniques, Skin Temperature, Stress, Calming, and Embarrassment, Auditory and Visual Reflexes, Blood Pressure and The Stroop Effect.

JASP: Experience a Fresh Way to Do Statistics

BOOTH 402

jasp-stats.org

Visit us and experience JASP, a statistical software package unlike any other. It is free and open-source, it comes with an attractive user interface, and it includes both Bayesian and classical analyses. With JASP it is easy to conduct analyses, save results, and share your findings with students and colleagues. Moreover, JASP allows you to annotate your output, thereby benefiting reviewers, collaborators, students, and your future self. JASP produces APA-formatted tables and publication-ready figures that you can directly copy-paste in your Word document. Standard analyses are available in the main menu, and specialized analyses can be invoked by loading dedicated modules. Designed with the user in mind, JASP provides immediate output and dynamically updates the results as you alter input options. Certain elements of JASP are reminiscent of SPSS — data are organized in a spreadsheet; variables can be dragged and dropped, option boxes can be ticked — but other elements are entirely novel. JASP was created because we believe that statistical analyses should be inclusive, free, and easy to execute. JASP has an online forum for questions, a YouTube channel for tutorial videos, a GitHub page for feature requests, and a quickly expanding group of fans and contributors. When you pay us a visit, we will give you the JASP tour and explain our philosophy and our plans for world domination.

Journal of Studies on Alcohol and Drugs

BOOTH 311

www.jsad.com

The *Journal of Studies on Alcohol and Drugs*, founded in 1940, publishes peer-reviewed research dealing with diverse aspects of alcohol and other drugs. The range of topics includes the biological, medical, epidemiological, social, psychological, legal, and other aspects of alcohol/other drug use, abuse, and dependence.

MindWare Technologies

BOOTH 414

www.mindwaretech.com

MindWare Technologies Ltd. is a provider of innovative hardware and software solutions for psychophysiology, life science, and cardiovascular research. With diverse engineering and experimental expertise, MindWare develops intuitive measurement equipment, lab systems, analysis software, and custom lab integration. We are your partners in research innovation.

Penguin Random House

BOOTH 304

Penguin Random House publishes a wide array of titles ideal for psychological science courses. Its publishing divisions include: **The Crown Publishing Group**, **Random House Group**, and **Penguin Random House Publisher Services** offer diverse lists of award-winning and best-selling non-fiction, fiction and memoir. Authors include Susan Cain, Charles Duhigg, and John Elder Robison. Visit our Website: www.RandomHouseAcademic.com; Like Us on Facebook: [RandomHouseAcademic](https://www.facebook.com/RandomHouseAcademic); Follow Us on Twitter: [@RHAcademic](https://twitter.com/RHAcademic).

The Knopf Doubleday Publishing Group publishes a broad range of outstanding titles in psychology for students and general readers. Visit the Penguin Random House booth to review new and acclaimed titles by Kay Redfield Jamison, Eliezer J. Sternberg, David Eagleman, and others.

Penguin Publishing Group publishes trade fiction and nonfiction books through a wide range of imprints. Psi Chi International Honor Society

BOOTH 212

www.psichi.org

Psi Chi, the International Honor Society in Psychology

is the largest student psychological association in the world with over 700,000 members inducted since its founding in 1929. We have over 1,140 chapters at colleges and universities primarily in the USA, including 17 chapters in 12 countries outside the US 50 states. Psi Chi provides support and encouragement for members to excel in scholarship and advance the science of psychology. We award over \$400,000 annually in scholarships, grants and awards and provide opportunities to publish in *The Psi Chi Journal of Psychological Research*.

Psychonomic Society

BOOTH 303

www.psychonomic.org

The Psychonomic Society is the preeminent society for the experimental study of cognition. Members study the basic, fundamental properties of how the mind works in areas such as memory, learning, problem solving, decision making, language, attention, and perception. The Society supports the global communication of scientific research through a variety of programs that includes seven highly regarded journals and an Annual Meeting attended by more than 2,500 cognitive psychologists from over 40 countries (this year in Vancouver, British Columbia, Canada, 9-12 Nov). In 2018, the International Meeting of the Psychonomic Society will be in Amsterdam, The Netherlands, 10-12 May.

Roger Williams University M.A. Psychology Programs

BOOTH 416

<http://grad.rwu.edu/>

Roger Williams University is a leading independent university located in Bristol, R.I., less than 20 miles from Providence and 70 miles from Boston. The University offers both the flagship 45-credit thesis (Ph.D. preparation) programs in Clinical and Forensic Psychology and the new 60-credit licensure (LMHC) preparation programs for students interested in working with general clinical or forensic populations. Over more than 10 years, the programs have placed dozens of graduates in clinical employment settings as well as highly competitive doctoral programs across the U.S. and abroad. For 2017, an extensive new scholarship and assistantship program was made available to support students in all master's tracks, providing financial support and paid research opportunities for competitive candidates.

Routledge, Taylor & Francis Group

BOOTH 310

www.routledge.com/psychology

Routledge, an imprint of the Taylor & Francis Group, is one of the world's leading academic publishers in Psychology and is associated with prominent names, prestigious learned societies and professional associations in the field. We publish a comprehensive portfolio of books, journals, and other resources on cognitive psychology, developmental psychology, neuropsychology, social psychology, research methods, statistics, testing and measurement, work and organizational psychology, and more.

SAGE Publishing

BOOTH 204

www.sagepublishing.com

Founded in 1965, SAGE Publishing is an independent company that disseminates

journals, books, and library products for the educational, scholarly, and professional markets.

Salimetrics

BOOTH 300

www.salimetrics.com

Salimetrics provides

innovative saliva-based bioscience research tools and services to investigators studying health, drug-discovery, behavior and development. Founded in 1998, Salimetrics supports global CROs, pharmaceuticals, academic researchers and the immunodiagnostic industry with the most accurate results through superior immunoassay products, participant-centric and validated saliva collection methods, laboratory testing services, and DNA analysis.

SAS Institute Inc., JMP Division

BOOTH 105

www.jmp.com

JMP® statistical discovery software from SAS is the tool of choice for scientists, engineers and other data explorers worldwide. JMP links dynamic data visualization with powerful statistics, in memory and on the desktop. Interactive and visual, JMP reveals insights that raw tables of numbers or static graphs tend to hide.

Silent Disclosure/Get2it

BOOTH 217

Get2it is a Silent Disclosure's (SDI) platform that enables researchers to gather information from study participants and team members in a secure and easy-to-use fashion. Get2it offers investigators limitless capacity and functionality to reach out to their study group on their mobile phones, tablets or desktop computers. The core of Get2it is the ability to create and evolve surveys, send secure notifications, text messaging, real time video/audio/ chat, and complex decision management when required. Researchers can see result data in real time, with the ability to drill down to the participant level and download the database at any time. Most importantly is Get2it capability to deliver your study in days or weeks, not months. Please contact: info@silentdisclosure.com or Linda Moffat, 703-568-0687

Society of Personality and Social Psychology

BOOTH 215

www.spsp.org

With over 7,000 members, the Society of Personality and Social Psychology is the largest organization of social psychologists and personality psychologists.

Springer Nature

BOOTH 205

www.springernature.com

Springer Nature is one of the world's leading global research, educational and professional publishers, home to an array of respected and trusted brands providing quality content through a range of innovative products and services. Springer Nature is the world's largest academic book publisher and numbers almost 13,000 staff in over 50 countries.

Top Hat

BOOTH 216
www.tophat.com

Top Hat's interactive, cloud-based teaching platform enables professors to engage students inside and outside the classroom with compelling content, tools and activities. Millions of students at over 750 leading North American colleges and universities use the Top Hat teaching platform. To learn more, visit www.tophat.com

TurkPrime

Optimizing Crowdsourced Research

BOOTH 213
www.turkprime.com

TurkPrime is an online research platform that integrates with Mechanical Turk and supports tasks that are common to the social and behavioral sciences. TurkPrime provides researchers with a comprehensive set of flexible tools that are delivered through a simple user interface. TurkPrime optimizes multiple crowdsourcing platforms for behavioral research. Expand beyond Mechanical Turk with our pool of over 2 million online participants.

University of Florida, Post-Doctoral Bridge Program

BOOTH 210
warrington.ufl.edu/graduate/academics/pdb

The Post-Doctoral Bridge Program at the University of Florida is designed to prepare participants for teaching careers in business schools. The PDBP is a 5-month certificate program created for individuals with doctorates in non-business disciplines. Educational Tracks are: Marketing/Management, International Business/Entrepreneurship and Finance/Accounting. For more information visit our website.

University of Michigan Program in Survey Methodology

BOOTH 214
psm.isr.umich.edu/

The University of Michigan Program in Survey Methodology seeks to train future generations of survey methodologists who specialize in the statistical, social, and data sciences. The program offers Doctor of Philosophy and Master of Science degrees through the University of Michigan. The program's home is the Institute for Social Research, the world's largest academically-based social science research institute. Survey methodology combines knowledge from several different fields of study. These fields include sociology, psychology, statistics, and data science. All students are required to take courses from each of these areas. Students will also specialize in either Survey Methods, Survey Statistics, or Data Science.

Worth Publishers/Macmillan Learning

BOOTH 410
www.macmillanlearning.com/psychology

Worth Publishers, a Macmillan Learning imprint, is a market-leading publisher in psychology, offering a full range of print and digital products that are widely acclaimed for their authorship, design, and overall effectiveness in the contemporary classroom. We are committed to publishing the highest quality textbooks, interactive learning tools, online assessments, and course management options for teachers and students throughout the psychology curriculum.

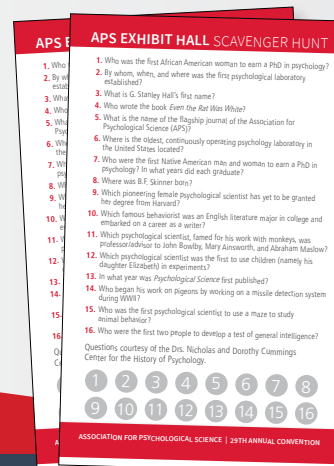

W.W. Norton

BOOTH 306
<http://books.wwnorton.com/books/index.aspx>

The oldest and largest publishing house owned wholly by its employees, W. W. Norton, Inc. publishes about 400 trade, college, and professional titles each year.

Reflections on What I've Learned From Walking (or Running) a Step With Students ($N = 9$)

Michelle "Mikki" R. Hebl

Rice University

In this talk, I will present some very brief portions of the bios of nine of my students. Within these bios are themes of humor, sadness, joy, marathon running, and a passion for psychology and research. It is my hope

that audiences will see their own students in my students, take away lessons, and affirm that they too appreciate the steps that they get to take with college students.

AFFILIATES

ACADEMY OF PSYCHOLOGICAL CLINICAL SCIENCE (APCS)

Thursday, May 25

8:00 AM – 12:00 PM

The Fens

Meeting of the Academy of Psychological Clinical Science

AMERICAN COLLEGE OF PROFESSIONAL NEUROPSYCHY (ACPN)

WORKSHOPS

Thursday, May 25

9:00 AM – 12:00 PM

Beacon F

Introduction to the Neuropsychological Assessment

Arthur M. Horton, Jr., Psych Associates

Clinical neuropsychology is an applied science focusing on the relationship between the brain and behavior. Neuropsychological assessment utilizes specialized psychological tests to evaluate a wide variety of cognitive functions and behaviors that are dependent on the structural and functional integrity of the brain.

1:30 PM – 4:30 PM

Beacon F

Neuropsychology of Drug Abuse, Pathological Gambling, and Sex Addiction

Arthur M. Horton, Jr., Psych Associates

Addiction to drugs, gambling, and sex presents a major problem for society. This workshop will focus on the neuropsychological effects of abused drugs, such as cocaine, heroin, and alcohol, and the neuropsychological assessment of drug abusers. In addition, the neuropsychology and characteristics of pathological gamblers and sex addicts will also be covered.

SCIENCE OF CHANGE

Thursday, May 25

8:00 AM – 4:00 PM

Riverway

3rd Annual Meeting: Neuroimaging Mechanisms of Behavior Change

CO-CHAIR: **Sarah Feldstein Ewing**, Oregon Health & Science University

CO-CHAIR: **Tammy Chung**, University of Pittsburgh

Presentations:

Rita Goldstein, Icahn School of Medicine at Mount Sinai, New York

Damien Fair, Advanced Imaging Research Center and Oregon Health & Science University

Tony George, University of Toronto, Canada

Elliot Stein, National Institute on Drug Abuse

James MacKillop, McMaster University, Canada

Elliot Berkman, University of Oregon

Martin Paulus, Laureate Institute for Brain Research

The goal of this meeting is to provide an innovative and synergistic forum to foster cross-disciplinary collaboration between neuroscientists and clinicians in conducting research on mechanisms of behavior change.

SOCIETY FOR THE STUDY OF MOTIVATION (SSM)

Thursday, May 25

8:00 AM – 8:00 PM

Back Bay B

10th Anniversary Meeting

The 10th Anniversary Meeting of the Society for the Study of Motivation will take place on May 25 in the Sheraton Boston Hotel. This year's program will feature a keynote address by Geoffrey Cohen (Stanford University), a presidential address by Peter Gollwitzer (New York University and University of Konstanz, Germany), several symposia, a data blitz session, a poster session, and the Annual SSM Members Business Meeting. Registration will be outside of Back Bay B.

UMass Lowell Department of Psychology **GRADUATE PROGRAMS**

The Department of Psychology offers graduate programs that foster critical and creative thinking grounded in the principles, methods and ethics of psychology as a scientific discipline and as a profession.

MASTER OF ARTS IN COMMUNITY SOCIAL PSYCHOLOGY

Faculty and students of the Community Social Psychology (CSP) master's degree program are committed to social justice and the empowerment of all individuals and communities. The program prepares graduates with the analytic, creative and practical skills needed to design and implement programs and services that will facilitate positive changes in communities.

The 36-credit program combines in-class learning, independent study, interdisciplinary collaboration and a one-year supervised practicum experience.

For more information: csp@uml.edu

MASTER OF SCIENCE IN AUTISM STUDIES

The Master of Science in Autism Studies Program (ASP) provides students with a full understanding of autism spectrum disorder. Through a blend of online and campus courses and practicum experience, students who complete the 42-credit program will be prepared for the national certification exam to become Board Certified Behavior Analysts® (BCBA®).

As BCBA's, graduates can work with schools and other agencies, supervise other direct service providers and conduct research.

For more information: asp@uml.edu

DOCTOR OF PHILOSOPHY IN APPLIED PSYCHOLOGY AND PREVENTION SCIENCE

The doctorate in Applied Psychology and Prevention Science (APPS), established in 2015, trains students and current practitioners to address real-world problems, promote optimal quality of life outcomes and encourage engagement in research across the curriculum with a goal of publication.

Students choose from one of three concentrations: community and applied social psychology, applied cognitive psychology or applied developmental psychology.

For more information: phd-apps@uml.edu

www.uml.edu/FAHSS/Psychology/Graduate

JUNE 26-30
29th International Congress
of Applied Psychology
MONTREAL

The International Association of Applied Psychology (IAAP) and the Canadian Psychology Association (CPA) invite you to attend the 29th International Congress of Applied Psychology (ICAP 2018) in beautiful Montréal, Québec, Canada.

Montréal is a premier location to host the 29th ICAP congress, with a centrally located convention centre, an assortment of cultural and historical attractions, as well as a variety of local food and music!

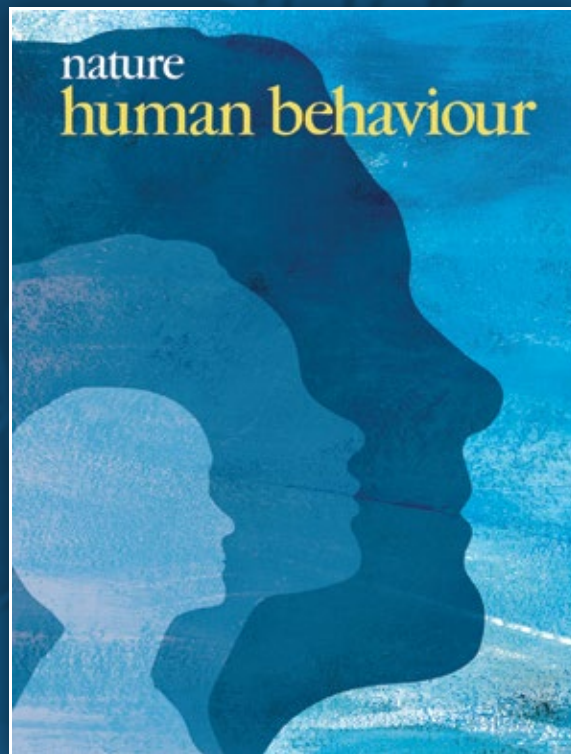

Psychology: Connecting Science to Solutions – the theme for the congress – was chosen to promote an increased exchange among psychologists from around the globe in their common pursuits of science and science-based solutions.

Join us in Montréal, Canada, from June 26-30, 2018 and be a part of this enhanced dialogue in psychological science!

W. W. NORTON

INDEPENDENT AND EMPLOYEE-OWNED

Delivering the best scholarship and innovative solutions for today's instructors and students.

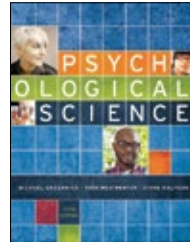

Psychology in Your Life

Second Edition

SARAH GRISON • TODD F. HEATHERTON
MICHAEL S. GAZZANIGA

Make science accessible to students at all levels by showing how psychology is relevant to their everyday lives. A strong, author-driven support package gives instructors everything they need to help today's students succeed.

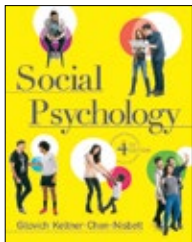

Psychological Science

Fifth Edition

MICHAEL S. GAZZANIGA
TODD F. HEATHERTON • DIANE F. HALPERN

New "Psychological Reasoning: What to Believe?" theme discusses major biases in psychological reasoning and explores them through everyday situations.

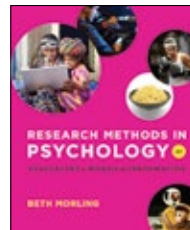

Social Psychology

Fourth Edition

THOMAS GILOVICH • DACHER KELTNER
SERENA CHEN • RICHARD NISBETT

New "Not So Fast" feature encourages critical thinking by gently nudging the reader to uncover common misperceptions in social psychology.

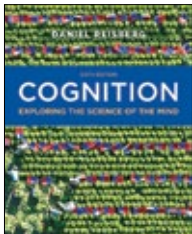

Research Methods in Psychology

Second Edition

BETH MORLING

A text that will make your students care about research methods as much as you do.

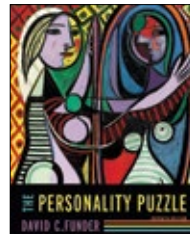

Cognition

Sixth Edition

DANIEL REISBERG

ZAPS 2.0 Cognition Labs and a new ebook with demonstrations give students a highly interactive way to learn cognitive psychology.

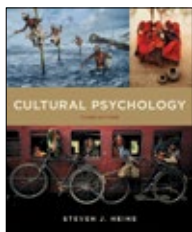

The Personality Puzzle

Seventh Edition

DAVID C. FUNDER

A personality text with a personality: David Funder continues to captivate students with his masterful writing.

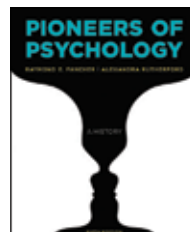

Cultural Psychology

Third Edition

STEVEN J. HEINE

A contemporary introduction to the field, showing students how cultural psychology is relevant to their lives, their society, and the larger world around them.

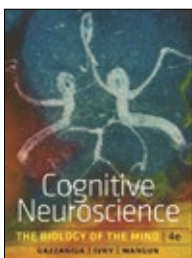

Pioneers of Psychology

Fifth Edition

RAYMOND E. FANCHER
ALEXANDRA RUTHERFORD

Written by professional historians of psychology, this text tells the stories of the men and women who have shaped our understanding of what it means to be human.

Cognitive Neuroscience

Fourth Edition

MICHAEL S. GAZZANIGA
RICHARD B. IVRY • GEORGE R. MANGUN

The most authoritative text is now the most accessible.

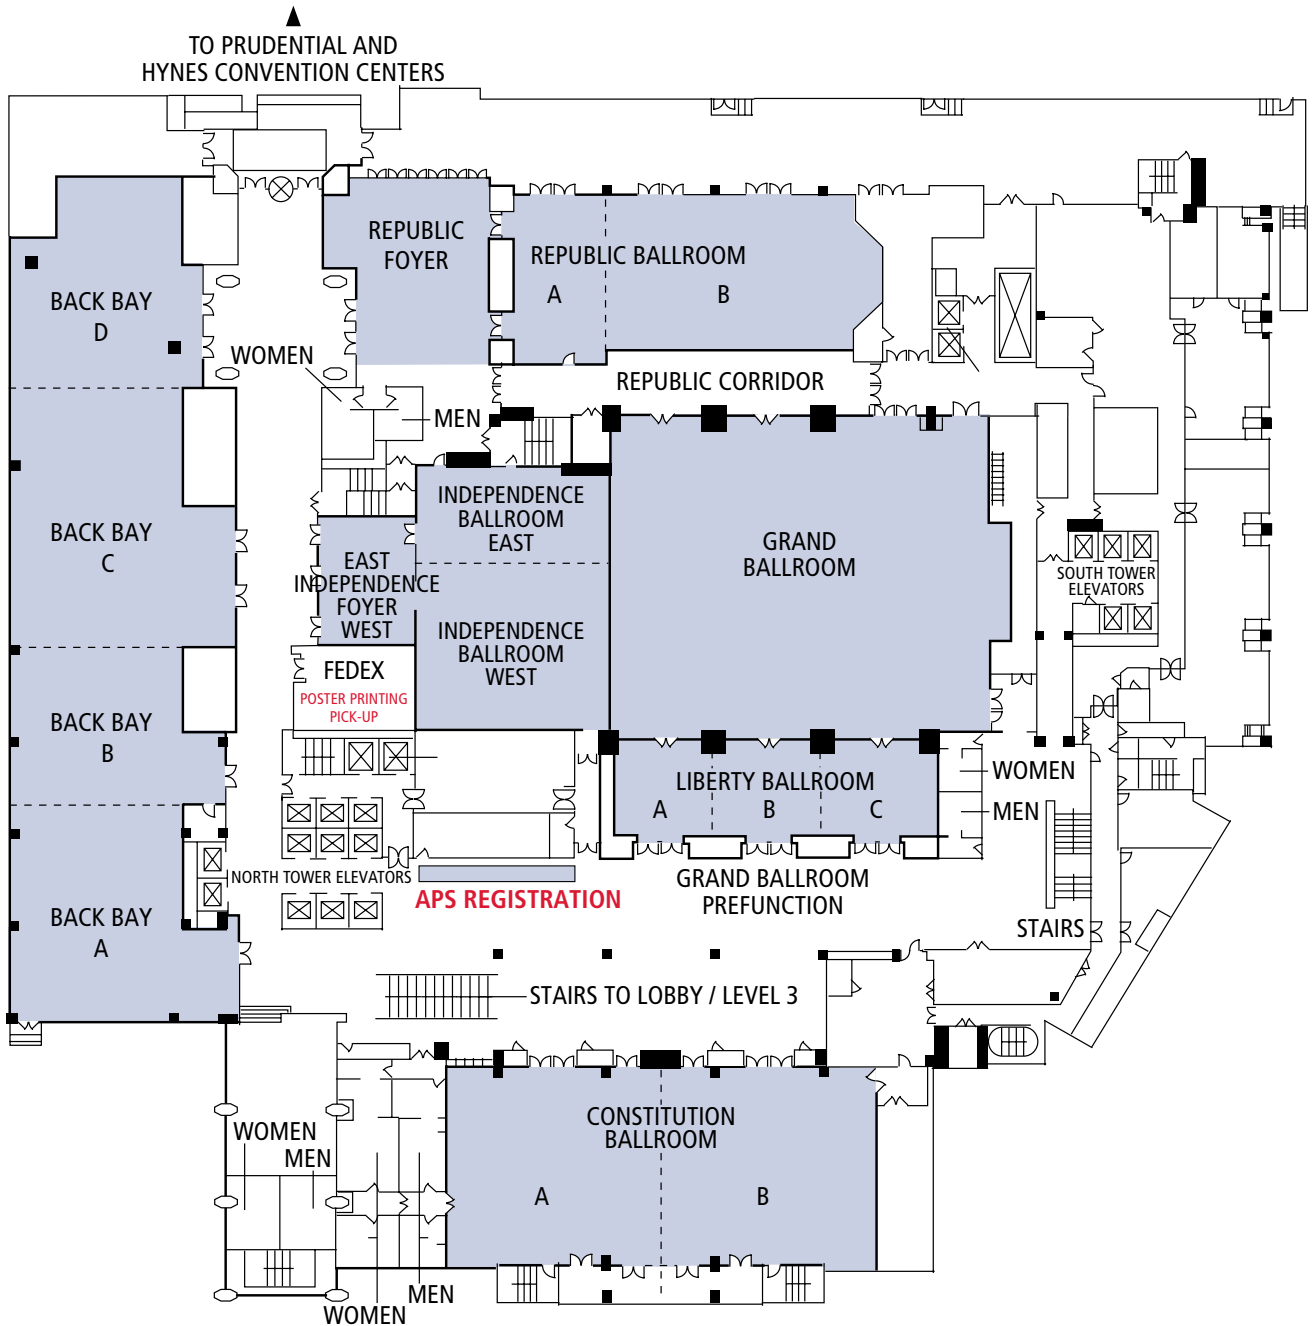

Developmental Psychology

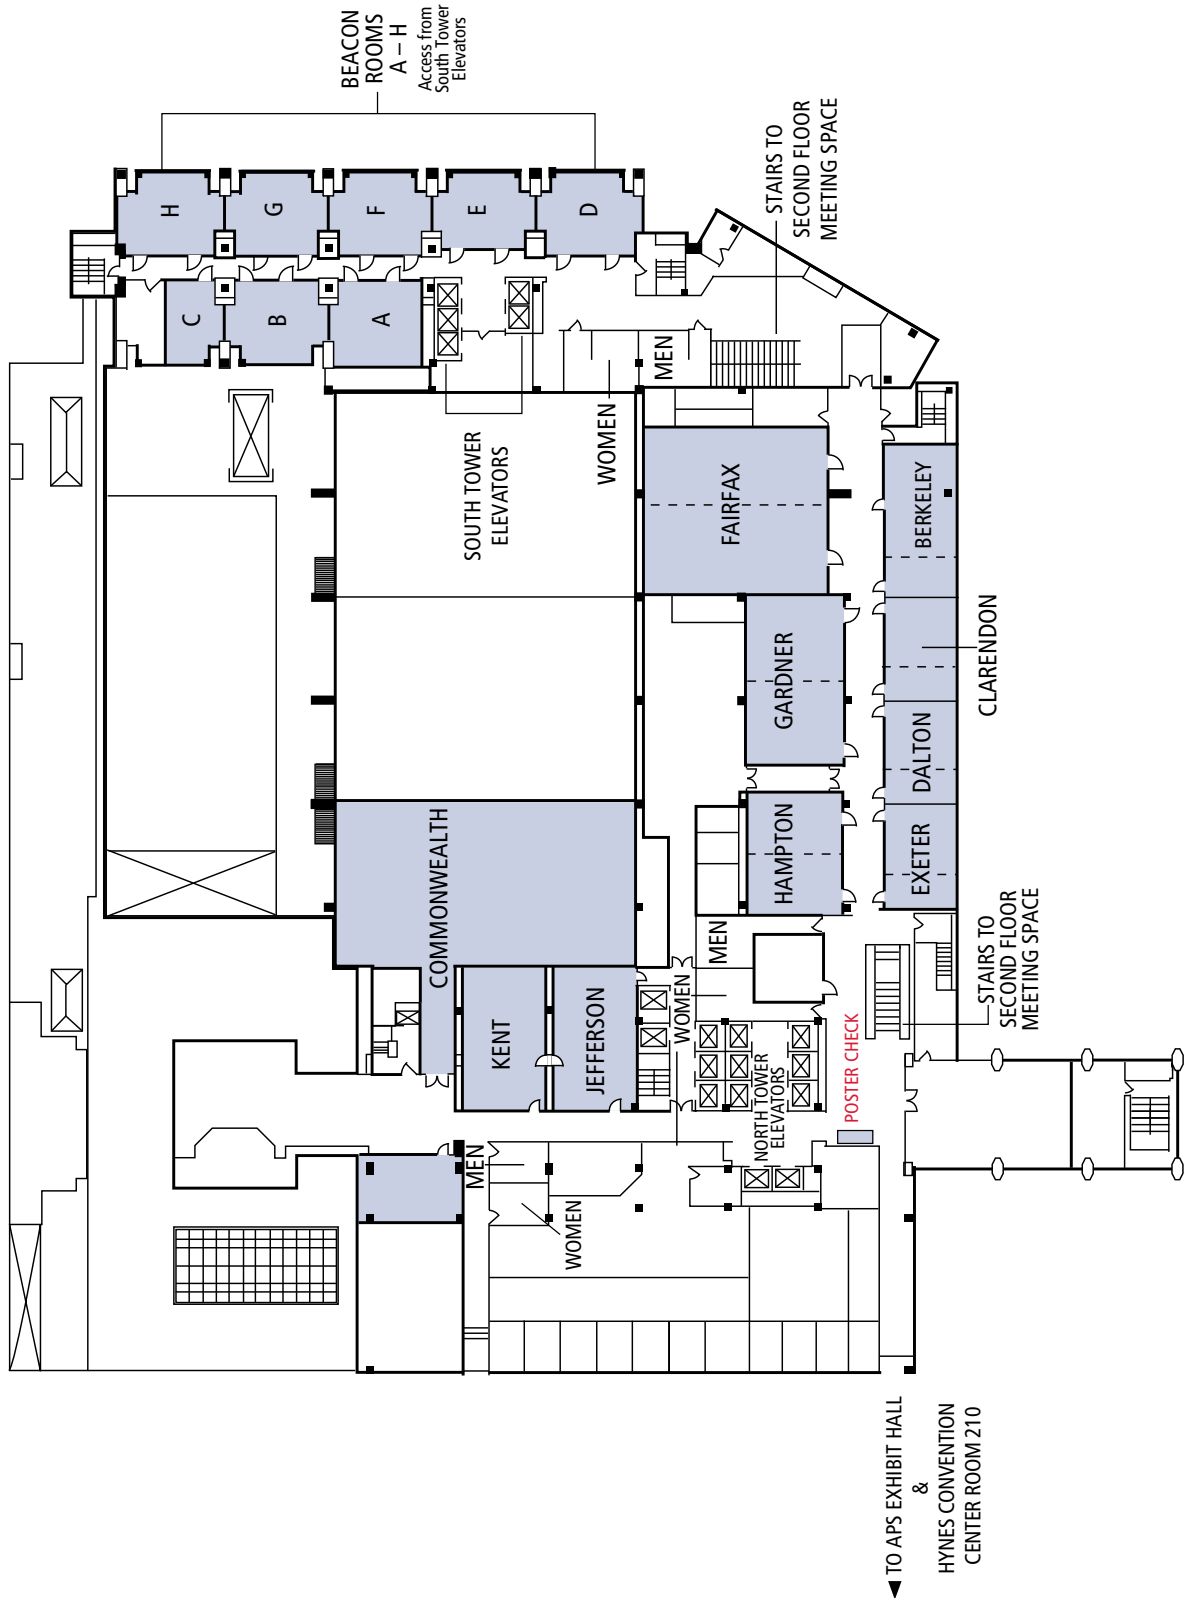

FRANK KEIL

Shows students how to think like developmental psychologists about child development.

Online Teaching Resources from SAGE!

 **SAGE** research
methods

What every researcher needs

SAGE Research Methods provides your department with a universe of peer-reviewed resources covering the entire research methods and statistics curriculum, allowing you to create a custom reading and resource list for your course. The platform holds more than 1,000 books, reference works, and journal articles; more than 500 case studies written by researchers in the field; more than 120 teaching datasets optimized to allow students to practice analytical methods; and 120 hours of streaming video showing research in action.

methods.sagepub.com

 **SAGE** video

Bringing teaching, learning and research to life

The **SAGE Video Psychology Collection** features more than 130 hours of video that will invigorate course teaching at all levels and provide assistance to the student and academic researcher. Watch original tutorials, many from SAGE's leading textbook authors, including walk-throughs on how to do psychological research, or how to understand many fascinating aspects of the field such as neuropsychology, drugs & behavior or social psychology; see professional psychologists in action, or venture back to the field's beginnings via footage of John B. Watson, Muzafer Sherif's and other early pioneers.
