# Survey Methodology

**The Michigan Program in Survey Methodology (MPSM)** is a program where students learn the science of surveys. Students in the program receive theoretical grounding in all aspects of survey methodology, from sample design and measurement, to modes of data collection, statistical estimation, questionnaire design and probability sampling methods. Students have the opportunity to explore novel ways to develop applications of survey methodology in a wide variety of fields.

# APS President's Letter

Welcome to Boston

On behalf of the APS Board of Directors, I am delighted to welcome you to the 29th Annual Convention of the Association for Psychological Science. Here in a setting just a short walk away from historic Fenway Park, I can promise you that the science you'll see over the next few days will touch all the bases of our playing field, from cognitive to developmental, biological to social, clinical to quantitative.

This dynamic and exciting program was made possible through the valiant efforts of Program Committee Chair Michelle "Lani" Shiota and committee members **Daniel Ansari, Silvia Bonaccio, Elizabeth Gershoff, Jeffrey Holmes, Thomas Olino, Elizabeth Page-Gould, Luiz Pessoa, Douglas Samuel, and Jessica Tracy.**

**Susan Goldin-Meadow**

Exciting new developments at APS serve as a backdrop for this year's convention. Our initiatives to enhance research methodology and practices are making great strides. We are developing a new journal, *Advances in Methods and Practices in Psychological Science*. Under the leadership of Editor Dan Simons, this journal will publish large-scale studies using new and innovative methods and modeling, best-practices papers, Registered Replication Reports, multi-lab collaborations, and more. And as part a newly designed website, APS has created a Methodology Center that provides our members with articles, tutorials and other resources on advances in research techniques and practices.

We are also still basking in the success of the second International Convention of Psychological Science, held in March in Vienna, Austria. Roughly 2,100 people from around the world gathered to discuss and learn about the latest cross-cutting ventures and explorations of the mind. ICPS is clearly an established event. And I'm delighted to announce that the third biennial ICPS will take place in March 2019 in Paris, France.

In the digital arena, APS continues to develop new ways to engage with the public and share the latest news and most recent findings in psychological science. Our association now has close to 48,000 Twitter followers and nearly 200,000 fans on Facebook. And visits to our website are climbing now thanks in part to a new design that displays as impressively on a mobile device as it does on a desktop screen.

I'm confident that the innumerable offerings you'll see at this year's annual convention will show you the tremendous range of discoveries, theoretical models, and methodological approaches represented here. This all reflects APS's role as a scientific canopy for more than 33,000 members spanning 97 countries — and almost as many specialties. Special thanks go to the APS staff who have hit a grand slam in putting together this event. I look forward to interacting with all of you over the next few days.

Enjoy this great meeting!

# Welcome from the 2017 APS Program Chair

Welcome to the 29th APS Annual Convention, and to our host city of Boston! On behalf of the Program Committee — Daniel Ansari, Silvia Bonaccio, Elizabeth Gershoff, Jeffrey Holmes, Thomas Olino, Elizabeth Page-Gould, Luiz Pessoa, Douglas Samuel, Jessica Tracy, Kathleen Vohs, and myself — I'd like to thank you for joining us this year!

This year's convention reflects the transformation now occurring in psychological science. We're asking critical questions about the state of our field, and exploring ways to improve the validity and impact of future work. We are a diverse group with many perspectives, so debates along the way are inevitable, yet we share common goals — to understand and improve the human experience, and help address the world's challenges in these turbulent times.

In developing this year's program, we chose to dive headlong into the major issues facing our discipline and society at large. The invited program addresses big-picture topics for the future of our field: How do we evaluate the overall state of psychological research? In what ways can our methods improve and grow in the years to come? What role should neuroscience play in the understanding of mind and behavior? What do we do when central findings, with serious theoretical and translational implications, are called into question? Theme programs, symposia, and talks offer data-driven analyses of important social problems as well, such as the roles of behavioral science in public policy, and in public conversations about social issues; the real-world consequences of implicit bias; and implications of fear for intergroup conflict and policy responses to terrorism.

The program also offers rich coverage of new directions and long-standing, central questions throughout our field. As always, methodology workshops and the APS-STP Teaching Institute offer outstanding training opportunities. Lila Gleitman's keynote address and Laurie Santos' "Bring the Family" address each consider uniquely human capacities in language and cognition. Susan Goldin-Meadow's presidential symposium features ways in which bodily interactions with the environment shape our mental lives. APS Lifetime Achievement Award speakers honor individuals whose careers have greatly advanced our understanding of the human mind. Symposia and talks address questions bridging theoretical, methodological, and applied concerns, such as: What challenges and opportunities will neuroimaging face in the decades to come? What are the implications of sleep deprivation for the workplace? Do "brain-training" programs actually work? What are the developmental pathways to psychological disorder, and how can we promote resilience? Can stress in early childhood have some positive long-term consequences? How do people make moral judgments and decisions?

As our discipline undergoes transformation, so do the individuals within it. We recognize that some invited speakers have been the focus of controversy in recent years. We want to hear what they have to say, and encourage you to listen with an open mind as well.

Personally, I'd like to express my gratitude to the APS staff for their immense effort and skill in organizing this convention, and APS Executive Director Sarah Brookhart for her dedicated leadership.

Finally, we know how much you, the members of APS, contribute to the intellectual richness and excitement of this meeting. Thank you for bringing your own work to the program; we look forward to seeing the fruits of your efforts this last year. I hope you enjoy the convention, and the historic City of Boston!

May 2017

Dear Friends:

On behalf of the Commonwealth of Massachusetts, Karyn and I welcome you to the 29<sup>th</sup> Annual Association for Psychological Science Convention.

The Association for Psychological Science has been inspiring researchers to delve into new and unconventional areas of study to expand the field of psychological sciences. The Association for Psychological Sciences has also provided a forum and a variety of journals such as Psychological Science, Current Directions in Physiological Science, and Psychological Science in the Public Interest for psychologist to publish their work.

We are delighted to welcome the Annual Association for Psychological Science Convention back to the city of Boston. The Baker-Polito administration encourages organizations such as these to continue to gather and inspire researchers to expand the field of Psychological Science.

Please accept our warmest wishes on a successful convention.  
Sincerely,

A handwritten signature in blue ink that reads "Charles Baker".

## 24th Annual APS-STP Teaching Institute

The Teaching Institute is sponsored by the Association for Psychological Science and the Society for the Teaching of Psychology. The day-long program offers informative talks and practical advice from experts on the teaching of psychology. See page 96 for schedule.

### Poster Sessions

Refer to the “2017 APS Convention” app and APS website ([www.psychologicalscience.org/convention](http://www.psychologicalscience.org/convention)) for times and locations of poster sessions. Posters may be stored at the poster storage desk located at the APS Exhibit Hall entrance in the Sheraton Boston Hotel.

### Name Badges

APS requires name badges for admission to all meeting rooms, the Exhibit Hall, and social events. Non-transferable name badges will only be issued to persons who have registered for the 29th APS Annual Convention.

### Convention Program

Attendees receive one APS Program book. The program (including posters and abstracts) is available in the “2017 APS Convention” app and online at [www.psychologicalscience.org/convention](http://www.psychologicalscience.org/convention).

### Workshops

Workshops are open to APS Convention and Teaching Institute registrants only. Separate registration is required for all workshops. Except where noted, there is a modest fee for workshop registration (students: \$45; all others: \$70). You can register at the APS Registration Desk. Refer to page 25 for more information on workshops.

### Hotel

All program activities for the 29th APS Annual Convention are in the Sheraton Boston Hotel (39 Dalton Street, Boston, MA 02199, USA; +1 617.236.2000). Maps of the Sheraton Boston Hotel are in the back of this program.

## Concierge

The Sheraton Boston Hotel staff will gladly assist with show tickets, restaurant reservations, city tours, and general information about Boston. Assistance is available at the Concierge Desk in the Lobby during hours of operation.

## Continuing Education Credits

The Temple University Department of Psychological Studies in Education (PSE) is approved by the American Psychological Association to sponsor continuing education for psychologists. PSE maintains responsibility for this program and its content. To receive credit you must arrive on time for each session, stay for the full session, complete and turn in the evaluation form at the end of each session.

## Exhibit Hall

Attendees are encouraged to visit the APS Exhibit Hall located on the Third Floor Foyer of the Sheraton Boston Hotel. The Exhibit Hall is open during poster sessions at the 29th APS Annual Convention. Exhibit Hall hours are:

<b>Thursday, May 25</b>	<b>8:00 PM – 9:30 PM</b>
<b>Friday, May 26</b>	<b>8:30 AM – 5:00 PM</b>
<b>Saturday, May 27</b>	<b>8:30 AM – 5:00 PM</b>
<b>Sunday, May 28</b>	<b>8:30 AM – 2:00 PM</b>

More information about exhibits is available on page 89.

## APS Convention App

With the free “2017 APS Convention” app you can search the full APS Convention program, including poster sessions, to create a custom schedule. Search the program by day, keyword, and speaker name to build your itinerary. The app is available for iPhone, iPad, and Android devices. If you don't have one of those “smart” devices, a web version is available at: <http://ativ.me/biq>.

# GENERAL INFORMATION (CONT.)

## Internet Access

APS is pleased to provide meeting attendees with complimentary wireless Internet access throughout the meeting space and lobby of the Sheraton Boston Hotel. Select the "SSID: SHERATON MEETING" wireless network. Launch a web browser then; when prompted, enter the Conference Code "aps2017" and click on "submit". (The conference Welcome Page or hotel main page will display and you can now browse the Internet.) As a courtesy to fellow attendees, please refrain from downloading large files.

## Photography and Video Release

As part of your registration for the 29th APS Annual Convention, APS reserves the right to use professional photographs and video taken during the Convention for future marketing purposes.

## Boston Convention & Visitors Bureau

The Sheraton Boston Hotel staff will gladly assist with show tickets, restaurant reservations, city tours, and general information about Boston. Assistance is available at the Concierge Desk in the lobby of the Sheraton Boston Hotel during hours of operation.

## ADA Accessibility/Accommodations

APS is committed to ensuring that the Convention is fully accessible to all persons. If you have a specific accessibility or dietary requirement, please contact Jennifer Alexander or Derica Clarke at the APS Registration Desk and every effort will be made to accommodate your request. The Sheraton Boston Hotel is fully equipped to accommodate special needs.

## Smoking Policy

The hotel is a smoke free building. All guest rooms, public space, and restaurants are non-smoking.

# 29TH ANNUAL CONVENTION

## Fred Kavli Keynote Address and Opening Ceremony

### **Rome Wasn't Built in a Day But Maybe Latin Was**

**Lila R. Gleitman**

University of Pennsylvania

**Thursday, May 25**

6:00 PM – 8:00 PM Grand Ballroom

Neither speech nor signed language leave a trace in the fossil record, so evidence on the evolution of language is necessarily indirect. I suggest that the language-learning child is a model of (or “is,” depending on what “is” is) language evolution in homo sapiens.

## Bring the Family Address

### **What Makes the Human Mind Special? Insights From Nonhuman Animals**

**Laurie R. Santos**

Yale University

**Saturday, May 27**

6:00 PM – 7:00 PM Grand Ballroom

Why are humans the only species that reads fiction, tells jokes, and shares photos on Instagram? In this talk, I will explore this question of human uniqueness by examining what makes the human mind so different from that of other animals. I will first discuss recent work in comparative cognition that shows a number of ways that other animals are strikingly similar to humans in the way they think about the world. I will also explore some key cognitive differences between humans and other animals that make the human species different from other animals but also a bit less rational than you might expect.

## Presidential Symposium

### **Sense and Sensibility: How Our Bodies Do — and Don't — Shape Our Minds**

**Susan Goldin-Meadow (Chair)**

The University of Chicago

**Friday, May 26**

6:00 PM – 8:00 PM Grand Ballroom

Human thoughts are not disembodied — they are created by people who use their bodies to interact with each other and the world around them. This symposium explores the ways in which our mental lives are — and are not — shaped by these bodily interactions with the environment. The speakers explore how using our bodies can influence four important aspects of the way we understand our world: (1) the way we see the world, (2) the way we feel about ourselves and the world, (3) the way we learn about the world, and (4) the way we communicate to others about the world.

### **How Our Bodies Shape How We See**

**Jessica K. Witt**

Colorado State University

### **Evaluating the Research on Postural Feedback: Strong Evidence That Expansive Posture Affects Feelings, Mixed Evidence That It Affects Behavior and Hormones**

**Amy J.C. Cuddy**

Harvard University

### **How Our Hands Help Us Learn: The Role of Gesture in Cognitive Change**

**Susan Wagner Cook**

The University of Iowa

### **The Emergence of American Sign Language From Depiction and Embodiment**

**Ted Supalla**

Georgetown University

FEATURING

## LILA R. GLEITMAN

PROFESSOR OF PSYCHOLOGY, EMERITA, UNIVERSITY OF PENNSYLVANIA

LILA R. GLEITMAN  
University of Pennsylvania

Lila R. Gleitman's is Professor of Psychology, Emerita, at the University of Pennsylvania. A linguist by training, Gleitman became fascinated by the psychological mechanisms underlying language learning when her own daughters learned to talk. Her research has uncovered basic, shared processes that allow children in a variety of circumstances — for example, both blind and sighted children — to arrive at remarkably similar understandings of the same native language. Gleitman's innovative work sets her apart as expert in developmental psychology, the mental lexicon, and the relationship between language and thought. She also has been recognized as a Fellow of APS, the Association for the Advancement of Science, the American Academy of Arts and Sciences, the National Academy of Sciences, and the Society of Experimental Psychologists. She has served as president of the Linguistic Society of America. In 1995, she was awarded the Prix Internationale by the Fyssen Foundation, and in 2017, she was awarded the David E. Rumelhart Prize by the Cognitive Science Society.

## SATURDAY, MAY 27

10:30 AM - 11:50 PM | ROOM 210, HYNES CONVENTION CENTER

Seating for this special event will begin at 10:30 AM. Doors will close at 10:45 AM.

Be part of a live studio audience for this interview in Boston.

Like its quasi-namesake, the APS Inside the Psychologist's Studio series features interviews with legends of psychological science. Lila R. Gleitman will be interviewed by APS President Susan Goldin-Meadow, The University of Chicago. During the conversation, Gleitman will look back on her research and accomplishments, and how those experiences shaped her career and the field.

Interviewed by

SUSAN GOLDIN-MEADOW  
The University of Chicago

*Gleitman joins a distinguished line-up of psychological scientists featured in the Inside the Psychologist's Studio video series (available online), which includes interviews with Albert Bandura, Paul Ekman, Annette D. Karmiloff-Smith, Elizabeth F. Loftus, Walter Mischel, Eleanor E. Maccoby, Steven Pinker, Michael I. Posner, Janet Taylor Spence, Claude M. Steele, and more.*
