2021 VIRTUAL
CONVENTION
MAY 26-27, 2021

PROGRAM BOOK

Annual Review of Developmental Psychology

VOLUMES 1 & 2 ONLINE NOW!

Co-Editors: **Susan A. Gelman**, *University of Michigan* and **Sandra R. Waxman**, *Northwestern University*

The *Annual Review of Developmental Psychology* covers the significant advances in the developmental sciences, including cognitive, linguistic, social, cultural, and biological processes across the lifespan. The invited reviews synthesize the theoretical, methodological, and technological developments made over the past several decades that have led to important new discoveries relevant beyond psychology, including education, cognitive science, economics, public health, and public policy.

For more information, visit our journal homepage: devpsych.annualreviews.org.

TABLE OF CONTENTS FOR VOLUME 2:

- *It's More Complicated*, Arnold J. Sameroff
- *Children's Socioemotional Development Across Cultures*, Heidi Keller
- *Bilingual Acquisition: The Early Steps*, Nuria Sebastian-Galles, Chiara Santolin
- *Children and Screens*, Brenna Hassinger-Das, Sarah Brennan, Rebecca A. Dore, Roberta Michnick Golinkoff, Kathy Hirsh-Pasek
- *The Social Function of Imitation in Development*, Harriet Over
- *Developing an Understanding of Science*, Andrew Shtulman, Caren Walker
- *Toward Realizing the Promise of Educational Neuroscience: Improving Experimental Design in Developmental Cognitive Neuroscience Studies*, Usha Goswami
- *Knowing What Others Think and Feel: Empathic Accuracy Across Adulthood*, Michaela Riediger, Elisabeth S. Blanke
- *Media and the Development of Gender Role Stereotypes*, L. Monique Ward, Petal Grower
- *Language Development in Context*, Meredith L. Rowe, Adriana Weisleder
- *The Origins of Social Knowledge in Altricial Species*, Katerina M. Faust, Samantha Carouso-Peck, Mary R. Elson, Michael H. Goldstein
- *Learning in Infancy Is Active, Endogenously Motivated, and Depends on the Prefrontal Cortices*, Gal Raz, Rebecca Saxe
- *A Glass Half Full and Half Empty: The State of the Science in Early Childhood Prevention and Intervention Research*, Philip A. Fisher, Tyson V. Barker, Kellyn N. Blaisdell
- *Impact of New Family Forms on Parenting and Child Development*, Susan Imrie, Susan Golombok
- *Play, Curiosity, and Cognition*, Junyi Chu, Laura E. Schulz
- *Decision Making Across Adulthood*, JoNell Strough, Wändi Bruine de Bruin
- *Neural Development of Memory and Metamemory in Childhood and Adolescence: Toward an Integrative Model of the Development of Episodic Recollection*, Simona Ghetti, Yana Fandakova
- *Polygenic Scores in Developmental Psychology: Invite Genetics In, Leave Biodeterminism Behind*, Laurel Raffington, Travis Mallard, K. Paige Harden
- *The Sleep of Reason Produces Monsters: How and When Biased Input Shapes Mathematics Learning*, Robert S. Siegler, Soo-hyun Im, Lauren K. Schiller, Jing Tian, David W. Braithwaite
- *The Connection Between Student Identities and Outcomes Related to Academic Persistence*, Mesmin Destin, Joanna Lee Williams
- *The Effects of Cannabis Use on the Development of Adolescents and Young Adults*, Wayne Hall, Janni Leung, Michael Lynskey
- *Screen Time, Social Media Use, and Adolescent Development*, Candice L. Odgers, Stephen M. Schueller, Mimi Ito
- *The Development of Emotion Reasoning in Infancy and Early Childhood*, Ashley L. Ruba, Seth D. Pollak
- *Bayesian Models of Conceptual Development: Learning as Building Models of the World*, Tomer D. Ullman, Joshua B. Tenenbaum
- *Development of ADHD: Etiology, Heterogeneity, and Early Life Course*, Joel T. Nigg, Margaret H. Sibley, Anita Thapar, Sarah L. Karalunas
- *Developmental Exposure to Air Pollution, Cigarettes, and Lead: Implications for Brain Aging*, Caleb E. Finch, Todd E. Morgan

Shinobu Kitayama

*APS President
University of Michigan, USA*

On behalf of the APS Board of Directors, it is my deep pleasure to welcome you to the 2021 APS Virtual Convention. I am sure we are all looking forward to this celebration of psychological science and those who make it possible. This year we come together a little differently than in the past. Psychological scientists from around the globe will convene from their offices and home offices, sometime kitchen tables, to meet virtually and share their research.

The exciting program was thoughtfully designed and coordinated by the excellent program committee, which includes members of both the APS Annual Convention and International Convention of Psychological Science originally planned for 2021: Aikaterini (Katerina) Fotopoulou, University College London, UK (Co-Chair); Ethan F. Kross, University of Michigan, USA (Co-Chair); June Gruber, University of Colorado, Boulder, USA (Co-Chair);

Yoshihisa Kashima, University of Melbourne, Australia (Co-Chair); Aaron J. Fisher, University of California Berkeley, USA; Aaron C. Kay, Duke University, USA; Berrin Erdogan, Portland State University, USA; Elisabeth Pacherie, Institut Jean-Nicod, France; Elizabeth Page-Gould, University of Toronto, Canada; Essi Viding, University College London, UK;

Franco Pestilli, The University of Texas at Austin, USA; Iris-Tatjana Kolassa, Ulm University, Germany; Kristen A. Lindquist, University of North Carolina, USA; Moustafa Bensafi, Centre de Recherche en Neurosciences de Lyon, France; Olivier Klein, Université Libre de Bruxelles, Belgium; R. Eric Landrum, Boise State University, USA; Sang Eun Woo, Purdue University, USA.

I look forward to “seeing” you over the next few days over the live chats in the sessions and across all of the networking events. I wish everyone a wonderful and enlightening two days!

Sincerely,

Shinobu Kitayama
APS President

The Psychology and Neurobiology of Friendship

Wednesday, May 26, 10:00 AM – 11:00 AM EDT (-4 UTC)

Friendships have evolved to buffer humans and other primates against the stresses of living in large social groups. They have a bigger effect on our psychological health and well-being, as well as on our physical health and well-being, than anything else. Friendships are, however, extremely expensive to maintain, in terms of both their time cost and the neurobiology that underpins them. The basis of this neurobiology lies in the endorphin system, which is triggered by physical touch acting through the afferent C-tactile neural system. In this lecture, I will compare the behavioral, cognitive, and neurobiological bases of friendships, and show how we use these as a foundation for forming communities.

Stanford University, USA*

Biased: Uncovering the Hidden Prejudice That Shapes What We See, Think, and Do

Thursday, May 27

3:00 PM – 4:00 PM EDT (-4 UTC)

Jennifer Eberhardt conducts research on race and inequality. Her work has revealed the startling extent to which racial imagery and judgments shape actions and outcomes in our criminal-justice system, neighborhoods, schools, and workplaces. Eberhardt not only highlights the negative impact of racial bias but offers direction on how to disrupt it. She received her Ph.D. from Harvard and joined the faculty at Yale in 1995. In 1998, she joined the Stanford faculty, where she still resides. In 2014, Eberhardt was named a MacArthur Fellow and a Leading Global Thinker by Foreign Policy. In 2016, she was elected to the AAAS and the NAS. Eberhardt is the author of *Biased: Uncovering the Hidden Prejudice That Shapes What We See, Think, and Do*.

Presidential Symposium

Shinobu Kitayama (chair)

*APS President
University of Michigan, USA*

**Race, Social Class, and Culture:
Toward a Theoretical Integration**

Wednesday, May 26, 3:00 PM – 4:00 PM
EDT (-4 UTC)

Hazel Rose Markus

Stanford University, USA

Michael Meaney*

The Douglas Research Centre, McGill University, Canada

Robert Sellers

University of Michigan, USA

*Due to unforeseen circumstances, Michael Meaney is unable to present in the Presidential Symposium at the 2021 APS Virtual Convention.

The days when globalization symbolized optimism for humanity are gone. Instead, years of globalization have laid bare disparities, contradictions, and tensions at the intersection of race, social class, and culture, placing humanity at a critical crossroad. This symposium highlights urgent research agendas in the integrative psychological science of race, social class, and culture and presents future research directions.

Bring the Family Address

Dan P. McAdams

Northwestern University, USA

**American Redemption: Variations on a
Good Life Story**

Thursday, May 27, 10:00 AM – 11:00 AM
EDT (-4 UTC)

Human beings are, by nature, storytelling animals. Beginning in the emerging adulthood years, we formulate internal life stories – narrative identities – reconstructing the past and imagining the future so as to confer upon our lives a sense of plot, purpose, and temporal coherence. In this talk, I go back a few decades to trace the origins of the concept of narrative identity and then flash forward to describe research on how American adults, in their midlife years, tell redemptive life stories. Tracking the developmental move from suffering to enhancement, redemptive life stories are positively associated with psychological well-being, civic engagement, and an adult's commitment to promoting the well-being of future generations. I end by relating a notable case study of one especially prominent American adult, Donald J. Trump, who, I believe, never formulated a narrative identity for his life.

Panel Discussions

Reimagining Work After COVID

Wednesday, May 26, 11:00 AM-12:00 PM EDT (-4 UTC)

The year of 2020 disrupted the way many of us work due to the global pandemic (COVID-19). Such disruptions included the sudden transition from physical to virtual workspaces, loss and change of jobs, and increased life demands outside of work. Meanwhile, recent technological advances have transformed the way people interact and conceptualize “work” (e.g., gig economy). This panel brings together leading scholars whose research speaks to how the nature of work has recently changed (highlighting specific effects of COVID-19 over the past year), and how it is likely to evolve further in the future.

Climate Change: Addressing Climate Change and its Psychological, Ethical, and Socio-Economic Challenges

Thursday, May 27, 11:00 AM-12:00 PM EDT (-4 UTC)

Climate change yields potentially devastating political, socioeconomic, and environmental consequences. To address the challenges the planet confronts, we need to take urgent and wide-ranging action. How should we assess the vulnerabilities of human societies and natural systems to climate change, and what are the options for adapting to it? What factors lead people to deny or accept climate change and its impacts? What factors drive them to effective individual and collective action?

Misinformation: Psychological Processes and Social Network Mechanisms

Thursday, May 27, 11:00 AM-12:00 PM EDT (-4 UTC)

The public availability and sources of information has been growing at a staggering rate in the last ten years. This growth is primarily due to technological innovation for connectivity such as cell-phones and internet-based social media platforms such as YouTube, Facebook, and Twitter among others. The increase in influx of information has implications for both the ability of the human cognitive system to remember, and sort information flows as well as for the psychological wellbeing of many of us. As the number of sources and amount of information increased, the ability of citizens to effectively sort out facts from non-facts has often been jeopardized. Understanding how the human mind can or fails at processing information as well as false misinformation can be critical for society to make steps towards regulating how information is delivered on public channels and by public officials. This panel will cover recent findings on the psychology of misinformation in relation to fundamental aspects of the human cognitive system, such as memory, aging, and decision making.

From Vaccine Hesitancy to Vaccine Confidence

Wednesday, May 26, 11:00 AM-12:00 PM EDT (-4 UTC)

Vaccine hesitancy is a multidimensional phenomenon, ranging from indifference to radical, anti-vaccine attitudes. In this panel, we consider psychological but also sociological, political and cultural underpinnings of this phenomenon and explore avenues for increasing vaccine confidence, especially with respect to the Covid-19 pandemic.

Don't SoTL for Less: Researching Teaching
and Learning for a Post Pandemic World

Thursday, May 27, 12:00 PM – 1:00 PM EDT
(-4 UTC)

Regan A.R. Gurung
Oregon State University, USA

Research on teaching and learning takes many forms and is conducted by many. In the 30 years since the phrase Scholarship of Teaching and Learning (SoTL) was coined, it has undergone many changes and goes by different names. In this session I will provide a contemporary picture of SoTL from within the psychological sciences, overview a process model to guide SoTL, review significant challenges for the practice, and directions for the future. I highlight the particular importance of SoTL in preparing for the new normal of a post-pandemic higher education environment. See a preview of Regan A.R. Gurung's talk.

Inclusivity Spotlight

Reducing Race and Other Disparities in
and through Psychological Research

Wednesday, May 27, 1:00 PM – 2:00 PM EDT
(-4 UTC)

A featured event in the Convention, this year's panel discussion will bring together experts to discuss racial disparities across the areas of psychological science and the role of Professional Societies in anti-racist action.

Clinical Science Forum

Celebrating 25 Years of the Academy of Psychological Clinical Science (APCS): Our Past, Present, and Future

Wednesday, May 26, 11:00 AM – 12:00 PM EDT (-4 UTC) and

Wednesday, May 26, 12:00 PM – 1:00 PM EDT (-4 UTC)

To commemorate the Academy's silver anniversary, ten leading psychological scientists at varying career stages will reflect on the successes, challenges, and opportunities for advancing clinical science — from basic research to prevention and intervention — and ultimately improving mental and behavioral health care. This program is organized by the Academy of Psychological Clinical Science and the Psychological Clinical Science Accreditation System.

Establishing Your Digital Presence

Alaina G. Levine

Quantum Success Solutions

Wednesday, May 26, 11:00 AM-12:00 PM EDT (-4 UTC)

More and more recruiters, search committees, job decision-makers and hiring managers are using the web to find, research, and vet potential candidates. How can you make sure that you are not only found, but are ahead of the pack? In this session, we will discuss how decision-makers use LinkedIn and other sites, and how you can use LinkedIn to establish yourself as a leader in your field, enhance your research reputation, and seek out and take advantage of innovative opportunities. We will demonstrate how to create a winning LinkedIn profile, and how to use its multitude of features to generate solid leads for your career and brand yourself as a leader in your profession.

Alaina G. Levine is an award-winning entrepreneur, STEM career consultant, professional speaker, TEDx speaker, science journalist & corporate comedian. Her book, *Networking for Nerds*. As President of Quantum Success Solutions, she is a prolific speaker & writer on career development & professional advancement for engineers & scientists. She also writes "Your Unicorn Career," a career column for ScienceCareers about finding your professional bliss. Levine authored two online courses for Oxford University Press on career development & entrepreneurship.

Careers Outside of Academia

Wednesday, May 26, 12:00 PM to 1:00 PM EDT (-4 UTC)

The dynamic job market has motivated a number of individuals to consider careers outside of academia. Because the process to successfully navigate such a path can often be mystifying, the Association for Psychological Science Student Caucus is thrilled to host a panel featuring professionals in both public and private industries. The panelists will speak about their unique experiences, including what led them to their current career path and advice they have for students and professionals considering a careers outside of academia. Meet these panelists during the live virtual Round Table discussion on Thursday, May 27.

Virtual Mentoring: Making the Relationship Work

Wednesday, May 26, 2:00 PM – 3:00 PM EDT (-4 UTC)

If we have learned anything from this past year it is how to be available without being present. In this session we meet up with mentors and mentee who met, interviewed, and developed relationships that have benefited all. This panel features faculty, graduate, and undergraduate students from various areas of psychological science who will share their experiences and offer advice on virtual mentorship. The discussion will include advice on transition to online mentorship, managing research assistants, finding balance, and challenges.

Speed Mentoring

Wednesday, May 26, 4:00 PM to 5:00 PM EDT (-4 UTC)

Pairing up has never been easier using this virtual tool that creates matches with a mentor and a mentee for a brief one-on-one conversation before moving on to create an entirely new pairing. Take this opportunity to create connections that could help you throughout your academic career and beyond.

Student Research and RISE Award Recognition

Thursday, May 27, 11:00 AM-12:00 PM EDT (-4 UTC)

Celebrate and learn about the award-winning research from APS students. Awardees will present their research during this one-hour session.

Round Table: Careers Outside of Academia

Thursday, May 27, 12:00 PM to 1:00 PM EDT (-4 UTC)

Join in small group discussions with the presenters from Wednesday's Careers Outside of Academia. Get your questions answered in this virtual face-to-face forum!

APS Pitch Perfect Competition Finals

Thursday, May 27, 2:00 PM – 3:00 PM EDT (-4 UTC)

APS Students will put their persuasive powers to the test when the finalists in the Pitch Perfect Three-Minute Thesis Competition kicks off at 2:00 p.m. on the final day of the APS 2021 Virtual Conference. Will you be there to cast your vote for the audience favorite?

Our six finalists are:

Felix Duplessis-Marcotte

Université du Québec à Montréal

Okie Nwakanma

Fordham University

Federico Magni

Hong Kong University of Science and Technology

Nicole Stucke

George Mason University

Hanna Teja

University of Guelph

Meltem Yucel

University of Virginia

Our panel of esteemed judges include:

Robert Groppe

APS Executive Director

Daniel Levitin

APS Charter Member and accomplished psychologist, musician, and producer.

Cassandra Lowe

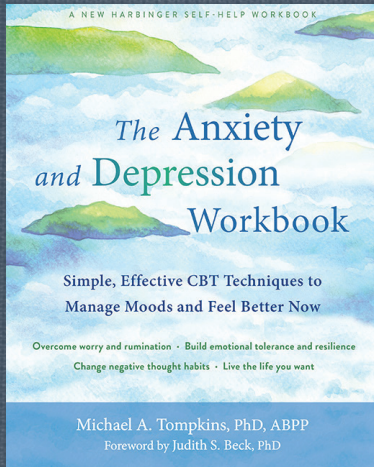

Professor, Western University and 2021 Rising Star

Amanda Merner

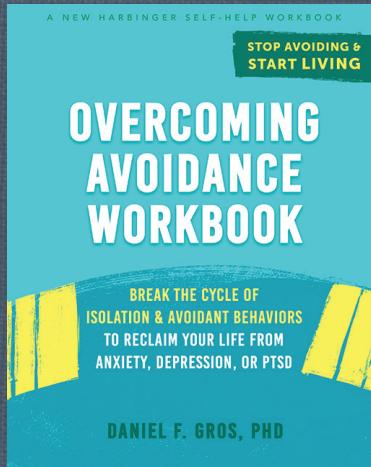

APSSC President and PhD candidate at Case Western University

APA Publishing: Equity Through Open Science

The American Psychological Association is proud to publish 90 peer-reviewed journals spanning the breadth and depth of psychology. At [APA Journals](#), our core values include **providing opportunities for equity, diversity, and the advancement of science**. In line with these values, we have developed an [Equity, Diversity, and Inclusion Framework](#) to guide our efforts toward a more equitable and inclusive psychology.

Visit our booth to learn about:

- Open science initiatives and policies that promote equity, including the author contribution model, constraints on generality, and positionality statements
- Standards for equitable research reporting, including APA Style JARS
- Our Spotlight on Student Researchers of Color, featuring the work of students from historically Black colleges and universities
- ...and more!

SOCIETY FOR THE
IMPROVEMENT OF
PSYCHOLOGICAL SCIENCE

Collabra: Psychology—the official journal of the Society for the Improvement of Psychological Science (SIPS)—is a mission-driven, open-access journal from the University of California Press that shares not only the research it publishes, but also the value created by the psychology community during the peer-review process. Collabra: Psychology has seven sections representing the broad field of psychology, and a highlighted focus area of “Methodology and Research Practice.”

The background of the slide is an abstract composition of wavy, overlapping lines in various shades of purple, magenta, and pink. The lines flow from the top left towards the bottom right, creating a sense of movement and depth. The colors transition from a lighter, almost white-pink at the top left to a deep, dark purple at the bottom left, with the right side of the slide being a solid, medium-dark purple.

The background features a series of overlapping, wavy lines that create a sense of depth and movement. The colors transition from a deep purple on the left to a bright pink on the right. The lines are smooth and fluid, resembling liquid or fabric. The overall effect is a vibrant, abstract composition.

Acta Psychologica

Covering all fields of psychology

Open Access

Join our evolution

Acta Psychologica relaunched as a multi-disciplinary, open science journal that publishes research across all disciplines of psychology.

Our goal is to become a meeting place that fosters collaboration within and between all fields of psychology to advance our understanding of human thought and behavior.

Six sections are managed by editors who are experts in their fields. Initially, our sections will include:

Clinical and health psychology

Section Editor:
Martin Dempster (UK)

Individual differences

Section Editors:
Colin Cooper (UK)
Julie Aitken Schermer (Canada)

Lifespan development

Section Editors:
Martha Arterberry (USA)
Gary Resnick (USA)

Cognition

Section Editor:
Wim Notebaert (Belgium)

Language psychology

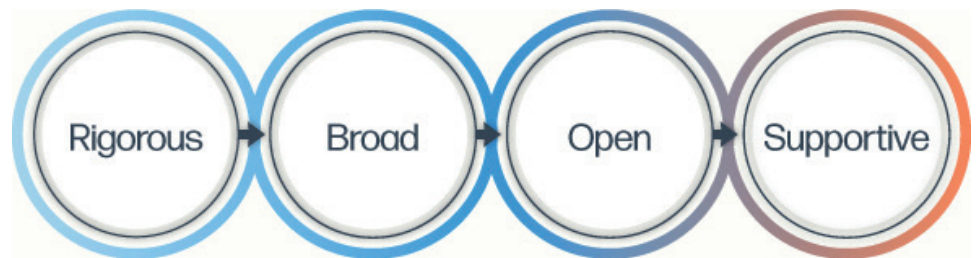

Section Editor:
Michael Kaschak (USA)

Social psychology

Section Editor:
Tobias Greitemeyer (Austria)

Four reasons
to publish with

**Acta
Psychologica**

We hope you will join us on this exciting new chapter.
What's new with your research?

Any questions? Please reach out to actpsy@elsevier.com

For the full aims and scope, or to submit your paper, visit:

journals.elsevier.com/acta-psychologica
